

**Georgia Child Support Commission
Technology and Calculator Subcommittee
Regina Quick, Esq., Chair
Wednesday, October 22, 2025
3:00 p.m. – 5:00 p.m.**

Meeting Summary

The Technology and Calculator Subcommittee of the Georgia Child Support Commission held a hybrid meeting on Wednesday, October 22, 2025, via Zoom Webinar and in person. Four (4) Subcommittee members attended. The Subcommittee members in attendance were:

Regina Quick Esq., Chair
Judge Warren Davis

Anna G. Bolden, Esq.
Jacqueline Fortier Esq.

Program Manager Kurt Bryan, Staff Attorney JoAnna Deering, and Project Coordinator Lazaro Quintanilla served as staff for this meeting.

Chair Quick opened the meeting at approximately 3:00 p.m., welcoming all attendees. Introductions were made of those attending online. A quorum of four (4) of the five (5) Subcommittee members was established. Noelle Lagueux-Alvarez, AOC CCFC Division Director, was present. Additionally, the following AOC IT staff members were present: KV Pratap, Ghyovani Vielot, and Matthew Faler. Chair Quick asked Lazaro to deliver the rules for the meeting. The previous Technology and Calculator Subcommittee meeting was held on September 12th, 2025. The minutes were previously distributed to all Subcommittee members. With no corrections being made, the minutes were unanimously approved.

Chair Quick reminded everyone that at the last meeting it was unanimously approved that the Subcommittee would recommend to the Commission on October 24th, 2025, that worksheets older than five years should be archived.

Chair Quick called on Kurt Bryan to introduce the AOC IT team before its presentation of the Cost Analysis Report. Ghyovani Vielot delivered the presentation for the IT team. Ghyovani stated that this October reflected significant cost reductions with a spending decrease of over 39% from the prior month. This cost reduction is due to removing the old calculator from its active status on an AWS platform.

Chair Quick called on Kurt Bryan to begin the demonstration of the new parenting time and low-income adjustments to the Georgia Child Support Calculator. Kurt Bryan accessed the staging environment of the Georgia Child Support Calculator website and provided a demonstration of how the newly built Schedule C will operate with the Parenting Time Adjustment, noting that the noncustodial parent cannot have more than 182.5 parenting days. Judge Davis asked how users will be able to quickly enter parenting days based on different parenting schedules. Kurt Bryan stated that for now the calculator will rely on user input, but that as a future enhancement a calendar tool can be implemented to assist the user. There will be, however, a pop-out feature that will provide the number of parenting days based on common parenting schedules. Kurt Bryan

highlighted that the parenting time adjustment follows a bell curve line, meaning that the higher amount of parenting days will give a higher monthly adjustment amount to the noncustodial parent. Kurt Bryan also emphasized that the parenting time adjustment was implemented in a way that would not impact the ability for judge or jury to deviate as needed.

Regina asked the Subcommittee to begin to consider where the calendar tool should be implemented. The Subcommittee discussed changing the language on schedule C to clarify how the parenting time adjustment is used in the overall worksheet.

Regina prompted Kurt Bryan to proceed with the low-income adjustment demonstration. Kurt Bryan provided a demonstration of how the low-income adjustment works within the calculator. Kurt Bryan also demonstrated an enhancement to the calculator of a new line of text that will clearly indicate which party pays the child support amount to the other.

Chair Quick asked the AOC IT team to ensure that the final changes will be ready for implementation before mid-December, 2025, in order to comply with the statutory requirements of Senate Bill 454.

Chair Quick will coordinate with Kurt to schedule the next Subcommittee meeting as needed. The meeting adjourned 3:52 p.m.
