## SECTION I

Child Support Commission Report December 2018

# GEORGIA COMMISSION ON CHILD SUPPORT 

Honorable R. Michael Key, Chair

The Child Support Commission Report

December 2018

The Georgia Commission on Child Support ("Commission") was created by Executive Order of the Governor, dated May 9, 2005, pursuant to O.C.G.A. §19-6-51.

Purpose and Mission. Pursuant to O.C.G.A. §19-6-50, the Commission was created and charged with the duties of collecting and studying information and data relating to awards of child support and creating a child support obligation table. The Commission is also responsible for conducting a comprehensive review of the child support guidelines, economic conditions, and all matters relevant to maintaining effective and efficient child support guidelines that will serve the best interest of Georgia's children and take into account the changing dynamics of family life. The other duties of the Child Support Commission include, but are not limited to: evaluating and considering the experiences and results in other states which utilize child support guidelines; developing
or causing to be developed software and a calculator associated with the use of the child support obligation table and guidelines; developing and publishing the child support obligation table and worksheets; developing training manuals and information to educate judges, attorneys and litigants on the use of the guidelines; collaborating with the Institute of Continuing Legal Education and Judicial Legal Education for the purpose of training persons who will be utilizing the child support table and child support guidelines; and making recommendations for proposed legislation.

Federal regulations and statutes require each state to review child support guidelines every four years. See 42 U.S.C. 667 and 45 C.F.R. 302.56. The Child Support Commission is charged with certifying the appropriateness and effectiveness of the state's guidelines. Pursuant to O.C.G.A. § 19-6-51, the Commission is staffed administratively to the Department of Human Services, but through an interagency contract, the Commission is staffed and housed at the Georgia Administrative Office of the Courts ("AOC").

History. The first Commission meeting was held on June 1, 2005. The Commission had an Economic Study ("Study") conducted as required by federal law, and the economists who conducted the Study developed a Basic Child Support Obligation Table ("Table"), which the Commission presented to the public through a series of public hearings and recommended to the Georgia General Assembly in 2006. The Georgia General Assembly approved the Table, and the Governor signed the bill (SB 382) that codified the full Basic Child Support Obligation Table. The Table became the central mechanism to calculate child support obligations in Georgia.

The statute creating the Child Support Commission in 2005 also changed the method by which child support is calculated; Georgia went from a flat percentage method to an income shares method. The Commission also made recommendations for extensive revisions to the original child support statute (HB 221) based on the need for clarification, ease of operation and interpretation. The Commission also reviewed the original statute to ensure that a conflict of laws did not exist, particularly in regard to the federal regulations which apply to the state's Child Support Agency (today known as the Division of Child Support Services). The Georgia General Assembly passed and the Governor signed this revised bill (SB382) in 2006, with the effective date of the revised child support guidelines being January 1, 2007.

Between the passage of the statute and its effective date, the Commission's staff, with the assistance of the Division of Child Support Services and the Family Law Section of the State Bar, conducted extensive training sessions for judges, attorneys, Division of Child Support Services staff, mediators, litigants and state librarians. In partnership with the Division of Child Support Services, state of the art worksheets and automated calculators were developed.

As required every four years by federal law (42 U.S.C. 667 and 45 C.F.R. 302.56), the Commission submitted its first report detailing the economic study, data gathering, and analysis of the guidelines and child support obligation table on June 30, 2006 to the Administration of Children and Families, U.S. Department of Health and Human Services. Subsequent reports were submitted in January of 2011 and 2015.

Time Span and Purpose of this Report. This report covers the activities of the Child Support Commission from January 2015 through October 2018. The report details the Child Support Commission's review of its guidelines, recommendations for legislative revisions, extensive training, as well as, an update on the online child support calculator and the retirement of the two Excel calculators and the EZ paper worksheet. Most importantly, to ensure that the application of the Basic Child Support Obligation Table results in appropriate child support award amounts and that the amount of deviations from the guidelines are also appropriate, this report will include the mandated review of the Obligation Table in light of: changing economic conditions; an analysis of case data regarding child support orders/worksheets gathered through a sampling; and an economic study on the costs of raising children in Georgia.

Current Membership. The Commission consists of fifteen members including: three superior court judges; a member of Georgia's appellate court; two members of the Georgia Senate and two members of the Georgia House of Representatives; and seven other members. Each member is appointed for a four year term, except that members of the legislature shall serve until completion of their current term.

The current members of the Child Support Commission are: Superior Court Judge Shawn LaGrua; Superior Court Judge Todd Markle; Superior Court Judge Emory Palmer; Georgia Court of Appeals Judge Anne Elizabeth Barnes; Representative Beth Beskin; Representative Timothy Barr; State Senator Chuck Hufstetler; State Senator Emanuel Jones; Juvenile Court Judge Lisa C. Jones; Juvenile Court Judge R. Michael Key; Mr. Chuck Clay; Ms. Katie Connell; Mr. Rick Smith; Dr. Roger Tutterow; and Ms. Wendy Williamson. Judge R. Michael Key serves as Chair of the Commission.

The Staff of the Commission, housed at the AOC, consists of the Staff Attorney, the Executive Program Manager and the Program Coordinator. In September of 2018, the Commission lost two long-serving staff members: Staff Attorney, Patricia Buonodono, began work in October of 2012 and resigned to return to private practice; and Program Coordinator, Bruce Shaw, transitioned to a new position with the Judicial Council, AOC. The current Commission staff members are: Aimee Maxwell, Staff Attorney; Elaine Johnson, Executive Program Manager; and Latoinna Lawrence, Program Coordinator. The new Staff Attorney and Program Coordinator were hired effective November 1, 2018 and have assumed staff duties to the Commission.

## Work of the Commission, 2015-2018.

A. Training.

During the years 2015 through 2018, staff continued training Georgia's judges, judicial staff, attorneys, mediators, Division of Child Support Services (DCSS) staff on the Child Support Guidelines, worksheets and calculators. In 2015, Commission staff held eighteen trainings, including nine of which were for Division of Child Support Services agents and attorneys; one training provided specifically for the Council of Superior Court Judges at their July training conference; three regional trainings for lawyers and judicial staff; and one training for the Office of State Administrative Hearings (OSAH) Administrative Law Judges. In 2016, similar trainings were offered in sixteen separate locations including three for the Division of Child Support Services (DCSS); three to mediators; and three to judges and judicial staff. A statewide training conference was held in November in Columbus with ninety-seven in attendance, including judges,
judicial staff, attorneys, legal staff, mediators and DCSS staff. Similar statewide trainings continued in 2017 and Commission staff added court district trainings for judges, attorneys, legal and judicial staff, mediators, and DCSS agents. A total of 19 child support training opportunities were provided by the Commission in 2017. In the year 2018, we continued the court district training offerings and conducted a total of 20 trainings during the year, including seven trainings for DCSS staff and four trainings for mediators. During the four years, we also continued to produce and maintain online training materials and resources for the public and self-represented litigants to assist them in preparing their worksheets on the Child Support Commission website, as well as on the Income Deduction Order website. As part of most of the trainings between 2014 and 2018, we included a one-hour presentation on Georgia's Income Deduction Order (IDO) process for judges, judicial staff, lawyers and their legal staff.

## B. Legislation.

2016 Legislative Session. The Statute Review Committee of the Commission, chaired by Fulton County Superior Court Judge Shawn LaGrua, proposed legislation to achieve the following:

- Repeal voluntary acknowledgments of legitimation.
- Clarify provisions relating to judicial petitions for legitimation.
- Provide provisions for witnesses to the signing of acknowledgments of paternity.
- Provide access to signed acknowledgments of paternity and voluntary acknowledgments of legitimation.

Change provisions relating to hospital programs for establishing paternity. These provisions were among those included in SB 64 during the 2016 Legislative Session, which passed the Georgia General Assembly and was signed by the governor. The legislative changes went into effect July 1, 2016.

2017 Legislative Session. The Statute Review Committee of the Commission, again chaired by Fulton County Superior Court Judge Shawn LaGrua, proposed legislation to achieve the following:

- Clean up language in the statute following the U.S. Supreme Court ruling in the Obergefell case to ensure Gender Neutrality by use of "parent" to describe each parent in an action.
- Change the Parenting Time Deviation so it may be used to increase or decrease the amount of child support.
- Provide Form Filing Requirements directing the worksheet and all relevant schedules must be filed.
- Provide for Multiple Worksheets and ensure the appropriate amount of support is being paid based upon the number of children in the home.
- Change Work Related Child Care for situations in which costs may be variable, allowing the judge or jury, at its discretion, to remove work related child care costs from the calculation of support.
- Change and clarify provisions relating to income deduction orders, including: the entry of a separate income deduction order; requirements upon the obligee to furnish documents; and provisions relating to the family support registry.

These provisions were among those included in SB 137 during the 2017 Legislative Session, which passed the Georgia General Assembly and was signed by the governor. The legislative changes went into effect July 1, 2017.

2018 Legislative Session. The Statute Review Committee of the Commission, chaired again by Fulton County Superior Court Judge Shawn LaGrua, proposed legislation to achieve the following:

- Clean up language in the statute to clarify that when, within two years of a final order being entered, there is a likelihood that a child will become ineligible to receive support, the court may allow the use of separate worksheets.
- Pursuant to the Final Federal Rule or Modernization Rule:
- Change Imputed Income for compliance with as set forth in 45 CFR 302.56(c)(iii).
- Add that incarceration may not be treated as voluntary unemployment as set forth in 45 CFR 302.56(c)(3).
- Change provision regarding health insurance coverage, stating insurance may be private or public coverage and/or through cash medical support as set forth in 45 CFR 302.56(c)(2).

These provisions were among those included in SB 427 during the 2018 Legislative Session, which passed the Georgia General Assembly and was signed by the governor. The legislative changes went into effect July 1, 2018.

See Addendum A for the current version of the Child Support Guidelines, O.C.G.A. § 19-6-15.

## C. Maintenance of the Child Support Calculators.

Georgia currently maintains one online child support calculator available on the Internet. The calculator may be accessed from the Commission's website:
http://csc.georgiacourts.gov/.

Amazing advances in technology have allowed improvements to our child support calculator. In 2014, the Commission's Technology and Calculator Committee studied and considered the future of the Excel calculators. Using Excel became a challenge. The worksheet had to be constantly updated to be compatible with each new version of Excel Microsoft released. The Committee began investigating the development of a new calculator to be accessible as an online application and brought in experts in the Information Technology field for guidance. The key considerations were the overall trajectory of technology and life expectancy of the Excel calculators. Upon consideration of all factors, the Commission voted to bid out the design and build our own online child support calculator. The process took approximately two years and, on August 8, 2016, the online child support calculator was released for public access.

The online calculator requires a person to set up a user account that is password protected and accessible using the Internet. The person simply enters information in
fields as prompted, and the calculator automatically populates the worksheets based upon the information entered. An advantage of this calculator over the Excel versions is that the most current version of the online child support forms is always available and there is no need to update software or create a new version each January.

Once the online calculator was released, the Commission considered when to retire the two downloadable Excel-based child support calculators and the Pen and Paper EZ worksheet. The retirement date was set for October 1, 2018. During the intervening two year period, Commission staff alerted the public, judiciary, lawyers, mediators, and the Division of Child Support Services of the retirement date. Training was conducted with a focus on teaching attendees how to establish a user account, navigate the calculator, create new worksheets, search for saved worksheets, how to print, and make the worksheets available to the court.

The staff received much feedback concerning the online child support calculator and overall the message is that the calculator is intuitive and easy to learn. For those who reach out for assistance, staff is available and glad to assist. Several helpful training resources have been developed and are available on the home page of the calculator. On each screen of the calculator is a link titled, "Technical Support Issue." A person can click the link and write a message to staff, including the issue and their contact information, and staff will respond promptly.

The calculator is continually being maintained and updated when needed by the Child Support Commission staff, with the assistance of a maintenance vendor.

## Review of the Basic Child Support Obligation Table, 2018.

## A. Case Sampling.

Pursuant to 42 U.S.C. 667 and 45 C.F.R. 302.56, the State must review and revise the guidelines, if appropriate, at least once every four years to ensure that their application results in the determination of appropriate child support award amounts. The State must consider economic data on the cost of raising children and analyze case data, gathered through sampling or other methods, on the application of and deviations from, the guidelines. 45 C.F.R. 302.56 (e) and (h). Even though the report to the U.S. Department of Health and Human Services, Office of Child Support Enforcement is submitted by each state's child support agency, it is the duty of the Commission to conduct the required review and study, as outlined in O.C.G.A. § 19-6-53. Thus, the Economic Study Committee of the Child Support Commission, chaired by Dr. Roger Tutterow, authorized case sampling and the analysis of case data.

In February 2018, the Child Support Commission staff began gathering data to assist DCSS with their federal report. As with the previous reviews, twelve counties were chosen through scientific means with the assistance of Commission member Dr. Roger Tutterow, a noted economist. The counties included in the 2018 case sampling were: Brooks, Chatham, Chattahoochee, Dawson, Evans, Hancock, Heard, Henry, Oconee, Pickens, Putnam and Worth. These counties represent a cross section of the socioeconomic makeup of Georgia. A request was made to the clerk of court for each of the chosen counties to submit their temporary and final child support orders and worksheets for the month of October 2017 to Child Support Commission staff.

October 2017 was chosen because it is a month consisting of 31 days and sufficient time had passed in the next year for the filing of temporary and final orders. A total of 184 child support orders and worksheets were furnished for the case sampling. Three of the twelve counties, Dawson, Heard, and Oconee, had no temporary or final orders filed in October 2017.

There was a new requisite in this study as set forth in the Flexibility, Efficiency, and Modernization in Child Support Enforcement Programs, (45 CFR 302.56(h)(2)), requiring states to include a comparison of child support payments. In order to obtain orders with child support payment information, the Division of Child Support Services (DCSS) provided an additional 175 orders collected from five counties: Clayton, Cobb, DeKalb, Fulton, and Gwinnett that were entered in the year 2016. Executive Program Manager Elaine Johnson and Program Coordinator Bruce Shaw gathered, organized, and entered the data in a report. Bruce Shaw analyzed and assembled the data that was then reviewed by all Commission staff. The results of the case sampling are contained within this report and a chart of the findings can be found in Addendum B.

A summary of the analysis derived is as follows:

1. 184 orders were received from nine of the twelve counties in the first case sampling for the 2018 study.

| Sample 1: Count by Case Type by County |  |  |  |
| :---: | :---: | :---: | :---: |
| County | DCSS <br> Total | Private Total | Grand Total |
| Brooks | 4 | 0 |  |
| Chatham | 55 | 41 |  |
| Chattahoochee | 0 | 2 |  |
| Dawson | 0 | 0 |  |
| Evans | 3 | 2 |  |
| Hancock | 2 | 0 |  |
| Heard | 0 | 0 |  |
| Henry | 15 | 44 |  |
| Oconee | 0 | 0 |  |
| Pickens | 3 | 1 |  |
| Putnam | 3 | 4 |  |
| Worth | 2 | 3 |  |
| Grand Total | 87 | 97 | 184 |

In the 2014 case sampling, 235 orders were reviewed in twelve different counties.
2. Eighty-two (82) orders in the first case sampling of 184 orders had one or more deviations noted. There were a total of 95 deviations for the 82 orders. This breaks down to forty-five percent (45\%) of the orders reviewed having a deviation noted.

| Sample 1: Count by Case Type by County |  |  |  |
| :---: | :---: | :---: | :---: |
| County | Case <br> Count | Count of <br> Cases <br> With <br> Deviations | \% of County Cases With Deviations |
| Brooks | 4 | 1 | 25\% |
| Chatham | 96 | 43 | 46\% |
| Chattahoochee | 2 | 1 | 5\% |
| Dawson | 0 | 0 | 0\% |
| Evans | 5 | 1 | 2\% |
| Hancock | 2 | 1 | 5\% |
| Heard | 0 | 0 | 0\% |
| Henry | 60 | 29 | 48\% |
| Oconee | 0 | 0 | 0\% |
| Pickens | 3 | 0 | 0\% |
| Putnam | 7 | 3 | 43\% |
| Worth | 5 | 3 | 6\% |
| Grand Total | 184 | 82 | 45\% |

In the 2014 case sampling $26 \%$ of the orders reviewed had a deviation noted.
3. Eighty-eight percent (88\%) or 72 of the orders with deviations reflected downward deviations. "Other - Nonspecific deviation" was used in $65 \%$ of the deviated cases and low income deviations were granted in $2 \%$ of the deviated cases.

In the 2014 case sampling, $88 \%$ were set as downward deviations. Seventy-five percent (75\%) of those were listed as nonspecific deviations; $5 \%$ were low income deviations.

The level of deviation in the first study is higher than 2014. This higher percentage of deviation may reflect low income deviations and Georgia judges' desire to individualize child support orders.

For more details, including the specific deviations used, see Addendum B.

## B. Economic Study.

The Commission/AOC contracted with Dr. Jane Venohr and her organization, the Center for Policy Research ("CPR"), for a formal assessment on whether Georgia's child support schedule should be updated. The assessment was to consider the economic data on the costs of child rearing and other economic factors used to develop a child support schedule. The case sampling data was furnished to CPR for the study.

Dr. Venohr and CPR initiated their Economic Study reviewing Georgia's current Basic Child Support Obligation Table. (For the purpose of their report, the Basic Child Support Obligation Table was referred to as "Schedule"). Dr. Venohr's report explains Georgia's current schedule remains "based on the most current economic data available in 2005. It relies on 2005 price levels and federal and state income tax rates and FICA." (See Addendum C for Dr. Venohr's "Economic Review of the Georgia Schedule of Basic Child Support Obligations," (2014) (hereinafter referred to as "2014 Report"), p. 3). The 2005 schedule was based on the average of two measurements of child-rearing expenditures: one based on the Betson-Rothbarth Methodology ("Rothbarth") and the other based on the Betson-Engle Methodology ("Engle"). Dr. Venohr states in her current report that, "Economists generally believe that the Rothbarth methodology underestimates actual child-rearing expenditures, while the Engle methodology overestimates actual child-rearing expenditures.

The 2014 Report contains two alternative schedules for the Commission's review, based upon the most recent Betson-Rothbarth measurements, known as the BR4 (see 2014 Report, p. 16) and the United States Department of Agriculture (USDA) study (see 2014 Report, p. 10). Dr. Venohr concludes that "[i]n general, the Georgia schedule is within range of the measurements of child-rearing expenditures produced by these three [Rothbarth, Engle and USDA] studies. This suggests that the Georgia schedule amounts are appropriate. When the Georgia schedule is compared to those of neighboring states, however, the Georgia schedule is relatively high. This is because most of the neighboring states use the lower bound of the range of credible measurements of childrearing expenditures." (See 2014 Report, p. 22).

The 2018 Report was presented to the Commission on September 21, 2018. The report fulfills the federal regulation that states review the guidelines, including requiring states to consider the economic data on the costs of raising children. For the complete CPR report, authored by Dr. Jane Venohr, entitled "Review of the Georgia Child Support Guidelines (2018)," see Addendum C.

## C. Child Support Commission's Recommendation to Maintain Current Tables.

In both the 2018 Report and Dr. Venohr's presentation of the report to the Commission on September 21, 2018, the conclusion is Georgia's schedule is based on acceptable measurements of child-rearing expenditures. Dr. Venohr and CPR recommend no changes should be made to the schedule at this time. Dr. Venohr does point out Georgia's schedule for very high incomes and for three or more children is "slipping into the low range." (p. 48).

Prior to accepting the Economic Report and Dr. Venohr's recommendation, the Commission sought public comment. Comments were accepting in writing, via the website, and at a public meeting conducted on November 1, 2018.

On November 6, 2018, the Economic Study Committee accepted Dr. Venohr's recommendation and by a unanimous vote decided to retain the current Basic Child Support Obligation Table. This recommendation was submitted to the full Commission on November 16, 2018, where, in a unanimous vote, the Commission accepted the study to retain the current Basic Child Support Obligation Table. Additionally, the Commission voted to create two study committees: the Parenting Time Deviation study committee, chaired by Commission member Kathleen (Katie) Connell, and the Low Income Deviation study committee, chaired by Commission member and Superior Court Judge, Emory Palmer, Coweta Judicial Circuit. The committees will be assisted in their work by the Commission staff.

The Child Support Commission wishes to thank the Honorable Governor Nathan Deal for the opportunity to serve the children and families of Georgia. The Commission is committed to continuing to carry its duties as it works to review, update and monitor any issues involving the child support guidelines. On behalf of the members of the Georgia Commission on Child Support, this report is submitted along with all supporting documents for consideration by the Georgia General Assembly and the Governor.

Dated this 12 the day of December, 2018.

## SECTION II

## ADDENDUM A

Child Support Guidelines and Basic Child Support Obligation Table

## O.C.G.A. § 19-6-15 <br> Copy Citation

Current through the 2018 Regular Session of the General Assembly
§ 19-6-15. Child support; guidelines for determining amount of award; continuation of duty of support; duration of support

## (a) Definitions. As used in this Code section, the term:

(1) Reserved.
(2) "Adjusted income" means the determination of a parent's monthly income, calculated by deducting from that parent's monthly gross income one-half of the amount of any applicable self-employment taxes being paid by the parent, any preexisting order for current child support which is being paid by the parent, and any theoretical child support order for other qualified children, if allowed by the court. For further reference see paragraph (5) of subsection (f) of this Code section.
(3) "Basic child support obligation" means the monthly amount of support displayed on the child support obligation table which corresponds to the combined adjusted income and the number of children for whom child support is being determined.
(4) "Child" means child or children.
(5) Reserved.
(6) "Child support obligation table" means the chart in subsection (o) of this Code section.
(6.1) "Child support services" means the entity within the Department of Human Services and its contractors that are authorized to enforce a duty of support.
(7) "Combined adjusted income" means the amount of adjusted income of the custodial parent added to the amount of adjusted income of the noncustodial parent.
(8) "Court" means a judge of any court of record or an administrative law judge of the Office of State Administrative Hearings.
(9) "Custodial parent" means the parent with whom the child resides more than 50 percent of the time. Where a custodial parent has not been designated or where a child resides with both parents an equal amount of time, the court shall designate the custodial parent as the parent with the lesser support obligation and the other parent as the noncustodial parent. Where the child resides equally with both parents and neither parent can be determined as owing a greater amount than the other, the court shall determine which parent to designate as the custodial parent for the purpose of this Code section.
(10) "Deviation" means an increase or decrease from the presumptive amount of child support if the presumed order is rebutted by evidence and the required findings of fact are made by the court pursuant to subsection (i) of this Code section.
(11) "Final child support amount" means the presumptive amount of child support adjusted by any deviations.
(12) "Gross income" means all income to be included in the calculation of child support as set forth in subsection (f) of this Code section.
(13) "Health insurance" means any general health or medical policy. For further reference see paragraph (2) of subsection (h) of this Code section.
(14) "Noncustodial parent" means the parent with whom the child resides less than 50 percent of the time or the parent who has the greater payment obligation for child support. Where the child resides equally with both parents and neither parent can be determined as owing a lesser amount than the other, the court shall determine which parent to designate as the noncustodial parent for the purpose of this Code section.
(15) "Nonparent custodian" means an individual who has been granted legal custody of a child, or an individual who has a legal right to seek, modify, or enforce a child support order.
(16) "Parent" means a person who owes a child a duty of support pursuant to Code Section 19-7-2.
(17) "Parenting time deviation" means a deviation allowed for the noncustodial parent based upon the noncustodial parent's court ordered visitation with the child. For further reference see subsections (g) and (i) of this Code section.

## (18) "Preexisting order" means:

(A) An order in another case that requires a parent to make child support payments for another child, which child support the parent is actually paying, as evidenced by documentation as provided in division (f)(5)(B)(iii) of this Code section; and
(B) That the date and time of filing with the clerk of court of the initial order for each such other case is earlier than the date and time of filing with the clerk of court of the initial order in the case immediately before the court, regardless of the age of any child in any of the cases.
(19) "Presumptive amount of child support" means the basic child support obligation including health insurance and work related child care costs.
(20) "Qualified child" or "qualified children" means any child:
(A) For whom the parent is legally responsible and in whose home the child resides;
(B) That the parent is actually supporting;
(C) Who is not subject to a preexisting order; and
(D) Who is not before the court to set, modify, or enforce support in the case immediately under consideration.

Qualified children shall not include stepchildren or other minors in the home that the parent has no legal obligation to support.
(21) "Split parenting" can occur in a child support case only if there are two or more children of the same parents, where one parent is the custodial parent for at least one child of the parents, and the other parent is the custodial parent for at least one other child of the parents. In a split parenting case, each parent is the custodial parent of any child spending more than 50 percent of the time with that parent and is the noncustodial parent of any child spending more than 50 percent of the time with the other parent. A split parenting situation shall have two custodial parents and two noncustodial parents, but no child shall have more than one custodial parent or noncustodial parent.
(22) "Theoretical child support order" means a hypothetical child support order for qualified children calculated as set forth in subparagraph $(f)(5)(C)$ of this Code section which allows the court to determine the amount of child support as if a child support order existed.
(23) "Uninsured health care expenses" means a child's uninsured medical expenses including, but not limited to, health insurance copayments, deductibles, and such other costs as are reasonably necessary for orthodontia, dental treatment, asthma treatments, physical therapy, vision care, and any acute or chronic medical or health problem or mental health illness, including counseling and other medical or mental health expenses, that are not covered by insurance. For further reference see paragraph (3) of subsection (h) of this Code section.
(24) "Work related child care costs" means expenses for the care of the child for whom support is being determined which are due to employment of either parent. In an appropriate case, the court may consider the child care costs associated with a parent's job search or the training or education of a parent necessary to obtain a job or enhance earning potential, not to exceed a reasonable time as determined by the court, if the parent proves by a preponderance of the evidence that the job search, job training, or education will benefit the child being supported. The term shall be projected for the next consecutive 12 months and averaged to obtain a monthly amount. For further reference see paragraph (1) of subsection (h) of this Code section.
(25) "Worksheet" or "child support worksheet" means the document used to record information necessary to determine and calculate monthly child support. For further reference see subsection (m) of this Code section.
(b) Process of calculating child support. Pursuant to this Code section, the determination of monthly child support shall be calculated as follows:
(1) Determine the monthly gross income of both the custodial parent and the noncustodial parent. Gross income may include imputed income, if applicable. The determination of monthly gross income shall be entered on the Child Support Schedule A -- Gross Income;
(2) Adjust each parent's monthly gross income by deducting the following from the parents' monthly gross income and entering it on the Child Support Schedule B -- Adjusted Income if any of the following apply:
(A) One-half of the amount of self-employment taxes;
(B) Preexisting orders; and
(C) Theoretical child support order for qualified children, if allowed by the court;
(3) Add each parent's adjusted income together;
(4) Locate the basic child support obligation by referring to the child support obligation table. Using the figure closest to the amount of the combined adjusted income, locate the amount of the basic child support obligation. If the combined adjusted income falls between the amounts shown in the table, then the basic child support obligation shall be based on the income bracket most closely matched to the combined adjusted income. The basic child support obligation amount stated in subsection (o) of this Code section shall be rebuttably presumed to be the appropriate amount of child support to be provided by the custodial parent and the noncustodial parent prior to consideration of health insurance, work related child care costs, and deviations;
(5) Calculate the pro rata share of the basic child support obligation for the custodial parent and the noncustodial parent by dividing the combined adjusted income into each parent's adjusted income to arrive at each parent's pro rata percentage of the basic child support obligation;
(6) Find the adjusted child support obligation amount by adding the additional expenses of the costs of health insurance and work related child care costs, prorating such expenses in accordance with each parent's pro rata share of the obligation and adding such expenses to the pro rata share of the basic child support obligation. The monthly cost of health insurance premiums and work related child care costs shall be entered on the Child Support Schedule D -- Additional Expenses. The pro rata share of the monthly basic child support obligation and the pro rata share of the combined additional expenses shall be added together to create the monthly adjusted child support obligation;
(7) Determine the amount of child support for the custodial parent and the noncustodial parent resulting in a monthly sum certain payment due to the custodial parent by assigning or deducting credit for actual payments for health insurance and work related child care costs from the basic child support obligation;
(8) In accordance with subsection (i) of this Code section, deviations subtracted from or added to the presumptive amount of child support shall be applied, if applicable, and if supported by the required findings of fact and application of the best interest of the child standard. The proposed
deviations shall be entered on the Child Support Schedule E -- Deviations. In the court's or the jury's discretion, deviations may include, but shall not be limited to, the following:
(A) High income;
(B) Low income;
(C) Other health related insurance;
(D) Life insurance;
(E) Child and dependent care tax credit;
(F) Travel expenses;
(G) Alimony;
(H) Mortgage;
(I) Permanency plan or foster care plan;
(J) Extraordinary expenses;
(K) Parenting time; and
(L) Nonspecific deviations;
(9) Any benefits which the child receives under Title II of the federal Social Security Act shall be applied against the final child support amount. The final child support amount for each parent shall be entered on the child support worksheet, together with the information from each of the utilized schedules;
(10) The parents shall allocate the uninsured health care expenses which shall be based on the pro rata responsibility of the parents or as otherwise ordered by the court. Each parent's pro rata responsibility for uninsured health care expenses shall be entered on the child support worksheet;
(11) In a split parenting case, there shall be a separate calculation and final order for each parent; and
(12) When there is more than one child for whom support is being determined, the court shall establish the amount of support and the duration
of such support in accordance with subsection (e) of this Code section. When, within two years of a final order being entered, there is a likelihood that a child will become ineligible to receive support, the court may allow for the use of separate worksheets. Separate worksheets shall show the final child support amount to be paid for all such children and the adjusted amount of support to be paid as each child becomes ineligible to receive support during such two-year period. Such worksheets shall be attached to the final order. Such order shall contain findings as required by law. A final order entered pursuant to this paragraph shall not preclude a petition for modification.

## (c) Applicability and required findings.

(1) The child support guidelines contained in this Code section are a minimum basis for determining the amount of child support and shall apply as a rebuttable presumption in all legal proceedings involving the child support responsibility of a parent. This Code section shall be used when the court enters a temporary or permanent child support order in a contested or noncontested hearing or order in a civil action filed pursuant to Code Section 19-13-4. The rebuttable presumptive amount of child support provided by this Code section may be increased or decreased according to the best interest of the child for whom support is being considered, the circumstances of the parties, the grounds for deviation set forth in subsection (i) of this Code section, and to achieve the state policy of affording to children of unmarried parents, to the extent possible, the same economic standard of living enjoyed by children living in intact families consisting of parents with similar financial means.
(2) The provisions of this Code section shall not apply with respect to any divorce case in which there are no minor children, except to the limited extent authorized by subsection (e) of this Code section. In the final judgment or decree in a divorce case in which there are minor children, or in other cases which are governed by the provisions of this Code section, the court shall:
(A) Specify in what sum certain amount, the duration of such support, and from which parent the child is entitled to permanent support as determined by use of the worksheet or multiple worksheets when there is more than one minor child;
(B) Specify in what manner, how often, to whom, and until when the support shall be paid;
(C) Include a written finding of each parent's gross income as determined by the court or the jury;
(D) Determine whether health insurance for the child involved is reasonably available at a reasonable cost to either parent. If the health insurance is reasonably available at a reasonable cost to the parent, then the court shall order that the child be covered under such health insurance;
(E) Include written findings of fact as to whether one or more of the deviations allowed under this Code section are applicable, and if one or more such deviations are applicable as determined by the court or the jury, the written findings of fact shall further set forth:
(i) The reasons the court or the jury deviated from the presumptive amount of child support;
(ii) The amount of child support that would have been required under this Code section if the presumptive amount of child support had not been rebutted; and
(iii) A finding that states how the court's or the jury's application of the child support guidelines would be unjust or inappropriate considering the relative ability of each parent to provide support and how the best interest of the child who is subject to the child support determination is served by deviation from the presumptive amount of child support;
(F) Specify the amount of the noncustodial parent's parenting time as set forth in the order of visitation;
(G) Include a written finding regarding the use of benefits received under Title II of the federal Social Security Act in the calculation of the amount of child support; and
(H) Specify the percentage of uninsured health care expenses for which each parent shall be responsible.
(3) When child support is ordered, the party who is required to pay the child support shall not be liable to third persons for necessaries furnished to the child embraced in the judgment or decree.
(4) In all cases, the parties shall submit to the court their worksheets and schedules and the presence or absence of other factors to be considered by the court pursuant to the provisions of this Code section.
(5) In any case in which the gross income of the custodial parent and the noncustodial parent is determined by a jury, the court shall charge the provisions of this Code section applicable to the determination of gross income. The jury shall be required to return a special interrogatory determining gross income. The court shall determine adjusted income, health insurance costs, and work related child care costs. Based upon the jury's verdict as to gross income, the court shall determine the presumptive amount of child support in accordance with the provisions of this Code section. The court shall inform the jury of the presumptive amount of child support and the identity of the custodial and noncustodial parents. In the final instructions to the jury, the court shall charge the provisions of this Code section applicable to the determination of deviations and the jury shall be required to return a special interrogatory as to deviations and the final award of child support. The court shall include its findings and the jury's verdict on the child support worksheet in accordance with this Code section and Code Section 19-5-12.
(6) Nothing contained within this Code section shall prevent the parties from entering into an enforceable agreement contrary to the presumptive amount of child support which may be made the order of the court pursuant to review by the court of the adequacy of the child support amounts negotiated by the parties, including the provision for medical expenses and health insurance; provided, however, that if the agreement negotiated by the parties does not comply with the provisions contained in this Code section and does not contain findings of fact as required to support a deviation, the court shall reject such agreement.
(7) In any case filed pursuant to Chapter 11 of this title, relating to the "Child Support Recovery Act," the "Uniform Reciprocal Enforcement of Support Act," or the "Uniform Interstate Family Support Act," the court shall make all determinations of fact, including gross income and deviations, and a jury shall not hear any issue related to such cases.
(d) Nature of guidelines; court's discretion. In the event of a hearing or trial on the issue of child support, the guidelines enumerated in this Code section are intended by the General Assembly to be guidelines only and any court so applying these guidelines shall not abrogate its responsibility in making the final determination of child support based on the evidence presented to it at the time of the hearing or trial. A court's final determination of child support shall take into account the obligor's earnings,
income, and other evidence of the obligor's ability to pay. The court shall also consider the basic subsistence needs of the parents and the child for whom support is to be provided.
(e) Duration of child support responsibility. The duty to provide support for a minor child shall continue until the child reaches the age of majority, dies, marries, or becomes emancipated, whichever first occurs; provided, however, that, in any temporary, final, or modified order for child support with respect to any proceeding for divorce, separate maintenance, legitimacy, or paternity entered on or after July 1, 1992, the court, in the exercise of sound discretion, may direct either or both parents to provide financial assistance to a child who has not previously married or become emancipated, who is enrolled in and attending a secondary school, and who has attained the age of majority before completing his or her secondary school education, provided that such financial assistance shall not be required after a child attains 20 years of age. The provisions for child support provided in this subsection may be enforced by either parent, by any nonparent custodian, by a guardian appointed to receive child support for the child for whose benefit the child support is ordered, or by the child for whose benefit the child support is ordered.

## (f) Gross income.

## (1) Inclusion to gross income.

(A) Attributable income. Gross income of each parent shall be determined in the process of setting the presumptive amount of child support and shall include all income from any source, before deductions for taxes and other deductions such as preexisting orders for child support and credits for other qualified children, whether earned or unearned, and includes, but is not limited to, the following:
(i) Salaries;
(ii) Commissions, fees, and tips;
(iii) Income from self-employment;
(iv) Bonuses;
(v) Overtime payments;
(vi) Severance pay;
(vii) Recurring income from pensions or retirement plans including, but not limited to, United States Department of Veterans Affairs, Railroad Retirement Board, Keoghs, and individual retirement accounts;
(viii) Interest income;
(ix) Dividend income;
(x) Trust income;
(xi) Income from annuities;
(xii) Capital gains;
(xiii) Disability or retirement benefits that are received from the Social Security Administration pursuant to Title II of the federal Social Security Act;
(xiv) Disability benefits that are received pursuant to the federal Veterans' Benefits Act of 2010, 38 U.S.C. Section 101, et seq.;
(xv) Workers' compensation benefits, whether temporary or permanent;
(xvi) Unemployment insurance benefits;
(xvii) Judgments recovered for personal injuries and awards from other civil actions;
(xviii) Gifts that consist of cash or other liquid instruments, or which can be converted to cash;
(xix) Prizes;
(xx) Lottery winnings;
(xxi) Alimony or maintenance received from persons other than parties to the proceeding before the court;
(xxii) Assets which are used for the support of the family; and (xxiii) Other income.
(B) Self-employment income. Income from self-employment includes income from, but not limited to, business operations, work as an independent contractor or consultant, sales of goods or services, and rental properties, less ordinary and reasonable expenses necessary to produce such income. Income from self-employment, rent, royalties, proprietorship of a business, or joint ownership of a partnership, limited liability company, or closely held corporation is defined as gross receipts minus ordinary and reasonable expenses required for self-employment or business operations. Ordinary and reasonable expenses of selfemployment or business operations necessary to produce income do not include:
(i) Excessive promotional, travel, vehicle, or personal living expenses, depreciation on equipment, or costs of operation of home offices; or
(ii) Amounts allowable by the Internal Revenue Service for the accelerated component of depreciation expenses, investment tax credits, or any other business expenses determined by the court or the jury to be inappropriate for determining gross income.

In general, income and expenses from self-employment or operation of a business should be carefully reviewed by the court or the jury to determine an appropriate level of gross income available to the parent to satisfy a child support obligation. Generally, this amount will differ from a determination of business income for tax purposes.
(C) Fringe benefits. Fringe benefits for inclusion as income or "in kind" remuneration received by a parent in the course of employment, or operation of a trade or business, shall be counted as income if the benefits significantly reduce personal living expenses. Such fringe benefits might include, but are not limited to, use of a company car, housing, or room and board. Fringe benefits shall not include employee benefits that are typically added to the salary, wage, or other compensation that a parent may receive as a standard added benefit, including, but not limited to, employer paid portions of health insurance premiums or employer contributions to a retirement or pension plan.
(D) Variable income. Variable income such as commissions, bonuses, overtime pay, military bonuses, and dividends shall be averaged by the court or the jury over a reasonable period of time consistent with the circumstances of the case and added to a parent's fixed salary or wages to determine gross income. When income is received on an irregular, nonrecurring, or one-time basis, the court or the jury may, but
is not required to, average or prorate the income over a reasonable specified period of time or require the parent to pay as a one-time support amount a percentage of his or her nonrecurring income, taking into consideration the percentage of recurring income of that parent.
(E) Military compensation and allowances. Income for a parent who is an active duty member of the regular or reserve component of the United States armed forces, the United States Coast Guard, the merchant marine of the United States, the commissioned corps of the Public Health Service or the National Oceanic and Atmospheric Administration, the National Guard, or the Air National Guard shall include:
(i) Base pay;
(ii) Drill pay;
(iii) Basic allowance for subsistence, whether paid directly to the parent or received in-kind; and
(iv) Basic allowance for housing, whether paid directly to the parent or received in-kind, determined at the parent's pay grade at the without dependent rate, but shall include only so much of the allowance that is not attributable to area variable housing costs.

Except as determined by the court or jury, special pay or incentive pay, allowances for clothing or family separation, and reimbursed expenses related to the parent's assignment to a high cost of living location shall not be considered income for the purpose of determining gross income.
(2) Exclusions from gross income. Excluded from gross income are the following:
(A) Child support payments received by either parent for the benefit of a child of another relationship;
(B) Benefits received from means-tested public assistance programs such as, but not limited to:
(i) PeachCare for Kids Program, Temporary Assistance for Needy Families Program, or similar programs in other states or territories under Title IV-A of the federal Social Security Act;
(ii) Food stamps or the value of food assistance provided by way of electronic benefits transfer procedures by the Department of Human Services;
(iii) Supplemental security income received under Title XVI of the federal Social Security Act;
(iv) Benefits received under Section 402(d) of the federal Social Security Act for disabled adult children of deceased disabled workers; and
(v) Low-income heating and energy assistance program payments;
(C) Foster care payments paid by the Department of Human Services or a licensed child placing agency for providing foster care to a foster child in the custody of the Department of Human Services; and
(D) A nonparent custodian's gross income.

## (3) Social Security benefits.

(A) Benefits received under Title II of the federal Social Security Act by a child on the obligor's account shall be counted as child support payments and shall be applied against the final child support amount to be paid by the obligor for the child.
(B) After calculating the obligor's monthly gross income, including the countable social security benefits as specified in division (1)(A)(xiii) of this subsection, and after calculating the amount of child support, if the presumptive amount of child support, as increased or decreased by deviations, is greater than the social security benefits paid on behalf of the child on the obligor's account, the obligor shall be required to pay the amount exceeding the social security benefit as part of the final order in the case.
(C) After calculating the obligor's monthly gross income, including the countable social security benefits as specified in division (1)(A)(xiii) of this subsection, and after calculating the amount of child support, if the presumptive amount of child support, as increased or decreased by deviations, is equal to or less than the social security benefits paid to the nonparent custodian or custodial parent on behalf of the child on the obligor's account, the child support responsibility of that parent shall have been met and no further child support shall be paid.
(D) Any benefit amounts under Title II of the federal Social Security Act as determined by the Social Security Administration sent to the nonparent custodian or custodial parent by the Social Security Administration for the child's benefit which are greater than the final child support amount shall be retained by the nonparent custodian or custodial parent for the child's benefit and shall not be used as a reason for decreasing the final child support amount or reducing arrearages.

## (4) Reliable evidence of income.

(A) Imputed income. When establishing the amount of child support, if a parent fails to produce reliable evidence of income, such as tax returns for prior years, check stubs, or other information for determining current ability to pay child support or ability to pay child support in prior years, and the court or the jury has no other reliable evidence of the parent's income or income potential, gross income for the current year may be imputed. When imputing income, the court shall take into account the specific circumstances of the parent to the extent known, including such factors as the parent's assets, residence, employment and earnings history, job skills, educational attainment, literacy, age, health, criminal record and other employment barriers, and record of seeking work, as well as the local job market, the availability of employers willing to hire the parent, prevailing earnings level in the local community, and other relevant background factors in the case. If a parent is incarcerated, the court shall not assume an ability for earning capacity based upon pre-incarceration wages or other employment related income, but income may be imputed based upon the actual income and assets available to such incarcerated parent.
(B) Modification. When cases with established orders are reviewed for modification and a parent fails to produce reliable evidence of income, such as tax returns for prior years, check stubs, or other information for determining current ability to pay child support or ability to pay child support in prior years, and the court or jury has no other reliable evidence of such parent's income or income potential, the court or jury may impute income as set forth in subparagraph (A) of this paragraph, or may increase the child support of the parent failing or refusing to produce evidence of income by an increment of at least 10 percent per year of such parent's gross income for each year since the final order was entered or last modified and shall calculate the basic child support obligation using the increased amount as such parent's gross income.
(C) Rehearing. If income is imputed pursuant to subparagraph (A) of this paragraph, the party believing the income of the other party is higher
than the amount imputed may provide within 90 days, upon motion to the court, evidence necessary to determine the appropriate amount of child support based upon reliable evidence. A hearing shall be scheduled after the motion is filed. The court may increase, decrease, or leave unchanged the amount of current child support from the date of filing of either parent's initial filing or motion for reconsideration. While the motion for reconsideration is pending, the obligor shall be responsible for the amount of child support originally ordered. Arrearages entered in the original child support order based upon imputed income shall not be forgiven. When there is reliable evidence to support a motion for reconsideration of the amount of income imputed, the party seeking reconsideration shall not be required to prove the existence of grounds for modification of an order pursuant to subsection (k) of this Code section.
(D) Willful or voluntary unemployment or underemployment. In determining whether a parent is willfully or voluntarily unemployed or underemployed, the court or the jury shall ascertain the reasons for the parent's occupational choices and assess the reasonableness of these choices in light of the parent's responsibility to support his or her child and whether such choices benefit the child. A determination of willful or voluntary unemployment or underemployment shall not be limited to occupational choices motivated only by an intent to avoid or reduce the payment of child support but can be based on any intentional choice or act that affects a parent's income. A determination of willful or voluntary unemployment or underemployment shall not be made when an individual's incarceration prevents employment. In determining willful or voluntary unemployment or underemployment, the court may examine whether there is a substantial likelihood that the parent could, with reasonable effort, apply his or her education, skills, or training to produce income. Specific factors for the court to consider when determining willful or voluntary unemployment or underemployment include, but are not limited to:
(i) The parent's past and present employment;
(ii) The parent's education and training;
(iii) Whether unemployment or underemployment for the purpose of pursuing additional training or education is reasonable in light of the parent's responsibility to support his or her child and, to this end, whether the training or education may ultimately benefit the child in the case immediately under consideration by increasing the parent's level of support for that child in the future;
(iv) A parent's ownership of valuable assets and resources, such as an expensive home or automobile, that appear inappropriate or unreasonable for the income claimed by the parent;
(v) The parent's own health and ability to work outside the home; and
(vi) The parent's role as caretaker of a child of that parent, a disabled or seriously ill child of that parent, or a disabled or seriously ill adult child of that parent, or any other disabled or seriously ill relative for whom that parent has assumed the role of caretaker, which eliminates or substantially reduces the parent's ability to work outside the home, and the need of that parent to continue in the role of caretaker in the future. When considering the income potential of a parent whose work experience is limited due to the caretaker role of that parent, the court shall consider the following factors:
(I) Whether the parent acted in the role of full-time caretaker immediately prior to separation by the married parties or prior to the divorce or annulment of the marriage or dissolution of another relationship in which the parent was a full-time caretaker;
(II) The length of time the parent staying at home has remained out of the work force for this purpose;
(III) The parent's education, training, and ability to work; and
(IV) Whether the parent is caring for a child who is four years of age or younger. If the court or the jury determines that a parent is willfully or voluntarily unemployed or underemployed, child support shall be calculated based on a determination of earning capacity, as evidenced by educational level or previous work experience. In the absence of any other reliable evidence, income may be imputed to the parent pursuant to a determination that gross income for the current year is based on a 40 hour workweek at minimum wage.

A determination of willful and voluntary unemployment or underemployment shall not be made when an individual is activated from the National Guard or other armed forces unit or enlists or is drafted for full-time service in the armed forces of the United States.

## (5) Adjustments to gross income.

(A) Self-employment. One-half of the self-employment and Medicare taxes shall be calculated as follows:
(i) Six and two-tenths percent of self-employment income up to the maximum amount to which federal old age, survivors, and disability insurance (OASDI) applies; plus
(ii) One and forty-five one-hundredths of a percent of selfemployment income for Medicare
and this amount shall be deducted from a self-employed parent's monthly gross income.
(B) Preexisting orders. An adjustment to the parent's monthly gross income shall be made on the Child Support Schedule B -- Adjusted Income for current preexisting orders for a period of not less than 12 months immediately prior to the date of the hearing or such period that an order has been in effect if less than 12 months prior to the date of the hearing before the court to set, modify, or enforce child support.
(i) In calculating the adjustment for preexisting orders, the court shall include only those preexisting orders meeting the criteria set forth in subparagraph (a)(18)(B);
(ii) The priority for preexisting orders shall be determined by the date and time of filing with the clerk of court of the initial order in each case. Subsequent modifications of the initial support order shall not affect the priority position established by the date and time of the initial order. In any modification proceeding, the court rendering the decision shall make a specific finding of the date, and time if known, of the initial order of the case;
(iii) Adjustments shall be allowed for current preexisting support only to the extent that the payments are actually being paid as evidenced by documentation including, but not limited to, payment history from a court clerk, the child support services' computer data base, the child support payment history, or canceled checks or other written proof of payments paid directly to the other parent. The maximum credit allowed for a preexisting order is an average of the amount of current support actually paid under the preexisting order over the past 12 months prior to the hearing date;
(iv) All preexisting orders shall be entered on the Child Support Schedule B -- Adjusted Income for the purpose of calculating the total amount of the credit to be included on the child support worksheet; and
(v) Payments being made by a parent on any arrearages shall not be considered payments on preexisting orders or subsequent orders and shall not be used as a basis for reducing gross income.
(C) Theoretical child support orders. In addition to the adjustments to monthly gross income for self-employment taxes provided in subparagraph (A) of this paragraph and for preexisting orders provided in subparagraph (B) of this paragraph, credits for either parent's other qualified child living in the parent's home for whom the parent owes a legal duty of support may be considered by the court for the purpose of reducing the parent's gross income. To consider a parent's other qualified children for determining the theoretical child support order, a parent shall present documentary evidence of the parent-child relationship to the court. Adjustments to income pursuant to this subparagraph may be considered in such circumstances in which the failure to consider a qualified child would cause substantial hardship to the parent; provided, however, that such consideration of an adjustment shall be based upon the best interest of the child for whom child support is being awarded. If the court, in its discretion, decides to apply the qualified child adjustment, the basic child support obligation of the parent for the number of other qualified children living with such parent shall be determined based upon that parent's monthly gross income. Except for self-employment taxes paid, no other amounts shall be subtracted from the parent's monthly gross income when calculating a theoretical child support order under this subparagraph. The basic child support obligation for such parent shall be multiplied by 75 percent and the resulting amount shall be subtracted from such parent's monthly gross income and entered on the Child Support Schedule B -- Adjusted Income.
(D) Multiple family situations. In multiple family situations, the priority of adjustments to a parent's monthly gross income shall be calculated in the following order:
(i) Preexisting orders according to the date and time of the initial order as set forth in subparagraph (B) of this paragraph; and
(ii) Application of any credit for a parent's other qualified children using the procedure set forth in subparagraph (C) of this paragraph.
(g) Parenting time deviation. The court or the jury may deviate from the presumptive amount of child support as set forth in subparagraph (i)(2)(K) of this Code section.
(h) Adjusted support obligation. The child support obligation table does not include the cost of the parent's work related child care costs, health insurance premiums, or uninsured health care expenses. The additional expenses for the child's health insurance premiums and work related child care costs shall be included in the calculations to determine child support. A nonparent custodian's expenses for work related child care costs and health insurance premiums shall be taken into account when establishing a final order.

## (1) Work related child care costs.

(A) Work related child care costs necessary for the parent's employment, education, or vocational training that are determined by the court to be appropriate, and that are appropriate to the parents' financial abilities and to the lifestyle of the child if the parents and child were living together, shall be averaged for a monthly amount and entered on the child support worksheet in the column of the parent initially paying the expense. Work related child care costs of a nonparent custodian shall be considered when determining the amount of this expense.
(B) If a child care subsidy is being provided pursuant to a meanstested public assistance program, only the amount of the child care expense actually paid by either parent or a nonparent custodian shall be included in the calculation.
(C) If either parent is the provider of child care services to the child for whom support is being determined, the value of those services shall not be an adjustment to the basic child support obligation when calculating the support award.
(D) If child care is provided without charge to the parent, the value of these services shall not be an adjustment to the basic child support obligation. If child care is or will be provided by a person who is paid for his or her services, proof of actual cost or payment shall be shown to the court before the court includes such payment in its consideration.
(E) The amount of work related child care costs shall be determined and added as an adjustment to the basic child support obligation as "additional expenses" whether paid directly by the parent or through a payroll deduction.

## (F)

(i) The total amount of work related child care costs shall be divided between the parents pro rata to determine the presumptive amount of child support and shall be included in the worksheet and the final order.
(ii) In situations in which work related child care costs may be variable, the court or jury may, in its discretion, remove work related child care costs from the calculation of support, and divide the work related child care costs pro rata, to be paid within a time specified in the final order. If a parent or nonparent custodian fails to comply with the final order:
(I) The other parent or nonparent custodian may enforce payment of the work related child care costs by any means permitted by law; or
(II) Child support services shall pursue enforcement when such unpaid costs have been reduced to a judgment in a sum certain.

## (2) Cost of health insurance premiums.

(A)
(i) The amount that is, or will be, paid by a parent for health insurance for the child for whom support is being determined shall be an adjustment to the basic child support obligation and prorated between the parents based upon their respective incomes. Payments made by a parent's employer for health insurance and not deducted from the parent's wages shall not be included. When a child for whom support is being determined is covered by a family policy, only the health insurance premium actually attributable to that child shall be added.
(ii) The amount of the cost for the child's health insurance premium shall be determined and added as an adjustment to the basic child support obligation as "additional expenses" whether paid directly by the parent or through a payroll deduction.
(iii) The total amount of the cost for the child's health insurance premium shall be divided between the parents pro rata to determine the total presumptive amount of child support and shall be included in the Child Support Schedule D -- Additional Expenses and written order of the court together with the amount of the basic child support obligation.
(B)
(i) If either parent has health insurance reasonably available at reasonable cost that provides for the health care needs of the child, then an amount to cover the cost of the premium shall be added as an adjustment to the basic child support obligation. A health insurance premium paid by a nonparent custodian shall be included when determining the amount of health insurance expense. In determining the amount to be added to the order for the health insurance cost, only the amount of the health insurance cost attributable to the child who is the subject of the order shall be included.
(ii) If coverage is applicable to other persons and the amount of the health insurance premium attributable to the child who is the subject of the current action for support is not verifiable, the total cost to the parent paying the premium shall be prorated by the number of persons covered so that only the cost attributable to the child who is the subject of the order under consideration is included. The amount of health insurance premium shall be determined by dividing the total amount of the insurance premium by the number of persons covered by the insurance policy and multiplying the resulting amount by the number of children covered by the insurance policy. The monthly cost of health insurance premium shall be entered on the Child Support Schedule D -- Additional Expenses in the column of the parent paying the premium.
(iii) Eligibility for or enrollment of the child in Medicaid, the PeachCare for Kids Program, or other public health care program shall satisfy the requirement that the final order provide for the child's health care needs. Health coverage through Medicaid, the PeachCare for Kids Program, or other public health care program shall not prevent a court from also ordering either or both parents to obtain other health insurance for the child.

## (3) Uninsured health care expenses.

(A) The child's uninsured health care expenses shall be the financial responsibility of both parents. The final order shall include provisions for payment of uninsured health care expenses; provided, however, that uninsured health care expenses shall not be used for the purpose of calculating the amount of child support. The parents shall divide uninsured health care expenses pro rata, unless otherwise specifically ordered by the court.
(B) If a parent fails to pay his or her pro rata share of the child's uninsured health care expenses, as specified in the final order, within a reasonable time after receipt of evidence documenting the uninsured portion of the expense:
(i) The other parent or the nonparent custodian may enforce payment of the expense by any means permitted by law; or
(ii) Child support services shall pursue enforcement of payment of such unpaid expenses only if the unpaid expenses have been reduced to a judgment in a sum certain amount.

## (i) Grounds for deviation.

## (1) General principles.

(A) The amount of child support established by this Code section and the presumptive amount of child support are rebuttable and the court or the jury may deviate from the presumptive amount of child support in compliance with this subsection. In deviating from the presumptive amount of child support, consideration shall be given to the best interest of the child for whom support under this Code section is being determined. A nonparent custodian's expenses may be the basis for a deviation as well as a noncustodial parent's ability or inability to pay the presumptive amount of child support.
(B) When ordering a deviation from the presumptive amount of child support, the court or the jury shall consider all available income of the parents and shall make written findings or special interrogatory findings that an amount of child support other than the amount calculated is reasonably necessary to provide for the needs of the child for whom child support is being determined and the order or special interrogatory shall state:
(i) The reasons for the deviation from the presumptive amount of child support;
(ii) The amount of child support that would have been required under this Code section if the presumptive amount of child support had not been rebutted; and
(iii) How, in its determination:
(I) Application of the presumptive amount of child support would be unjust or inappropriate; and
(II) The best interest of the child for whom support is being determined will be served by deviation from the presumptive amount of child support.
(C) No deviation in the presumptive amount of child support shall be made which seriously impairs the ability of the custodial parent to maintain minimally adequate housing, food, and clothing for the child being supported by the order and to provide other basic necessities, as determined by the court or the jury.
(D) If the circumstances which supported the deviation cease to exist, the final order may be modified as set forth in subsection (k) of this Code section to eliminate the deviation.

## (2) Specific deviations.

(A) High income. For purposes of this subparagraph, parents are considered to be high-income parents if their combined adjusted income exceeds $\$ 30,000.00$ per month. For high-income parents, the court shall set the basic child support obligation at the highest amount allowed by the child support obligation table but the court or the jury may consider upward deviation to attain an appropriate award of child support for highincome parents which is consistent with the best interest of the child.

## (B) Low income.

(i) If the noncustodial parent can provide evidence sufficient to demonstrate no earning capacity or that his or her pro rata share of the presumptive amount of child support would create an extreme economic hardship for such parent, the court may consider a lowincome deviation.
(ii) A noncustodial parent whose sole source of income is supplemental security income received under Title XVI of the federal Social Security Act shall be considered to have no earning capacity.
(iii) The court or the jury shall examine all attributable and excluded sources of income, assets, and benefits available to the noncustodial parent and may consider the noncustodial parent's basic subsistence needs and all of his or her reasonable expenses, ensuring that such expenses are actually paid by the noncustodial parent and are clearly justified expenses.
(iv) In considering a request for a low-income deviation, the court or the jury shall then weigh the income and all attributable and excluded sources of income, assets, and benefits and all reasonable expenses of each parent, the relative hardship that a reduction in the amount of child support paid to the custodial parent would have on the custodial parent's household, the needs of each parent, the needs of the child for whom child support is being determined, and the ability of the noncustodial parent to pay child support.
(v) Following a review of the noncustodial parent's gross income and expenses, and taking into account each parent's basic child support obligation adjusted by health insurance and work related child care costs and the relative hardships on the parents and the child, the court or the jury, upon request by either party or upon the court's initiative, may consider a downward deviation to attain an appropriate award of child support which is consistent with the best interest of the child.
(vi) For the purpose of calculating a low-income deviation, the noncustodial parent's minimum child support for one child shall be not less than $\$ 100.00$ per month, and such amount shall be increased by at least $\$ 50.00$ for each additional child for the same case for which child support is being ordered.
(vii) A low-income deviation granted pursuant to this subparagraph shall apply only to the current child support amount and shall not prohibit an additional amount being ordered to reduce a noncustodial parent's arrears.
(viii) If a low-income deviation is granted pursuant to this subparagraph, such deviation shall not prohibit the court or jury from granting an increase or decrease to the presumptive amount of child support by the use of any other specific or nonspecific deviation.
(C) Other health related insurance. If the court or the jury finds that either parent has vision or dental insurance available at a reasonable cost for the child, the court may deviate from the presumptive amount of child support for the cost of such insurance.
(D) Life insurance. In accordance with Code Section 19-6-34, if the court or the jury finds that either parent has purchased life insurance on the life of either parent or the lives of both parents for the benefit of the child, the court may deviate from the presumptive amount of child
support for the cost of such insurance by either adding or subtracting the amount of the premium.
(E) Child and dependent care tax credit. If the court or the jury finds that one of the parents is entitled to the Child and Dependent Care Tax Credit, the court or the jury may deviate from the presumptive amount of child support in consideration of such credit.
(F) Travel expenses. If court ordered visitation related travel expenses are substantial due to the distance between the parents, the court may order the allocation of such costs or the jury may by a finding in its special interrogatory allocate such costs by deviation from the presumptive amount of child support, taking into consideration the circumstances of the respective parents as well as which parent moved and the reason for such move.
(G) Alimony. Actual payments of alimony shall not be considered as a deduction from gross income but may be considered as a deviation from the presumptive amount of child support. If the court or the jury considers the actual payment of alimony, the court shall make a written finding of such consideration or the jury, in its special interrogatory, shall make a written finding of such consideration as a basis for deviation from the presumptive amount of child support.
(H) Mortgage. If the noncustodial parent is providing shelter, such as paying the mortgage of the home, or has provided a home at no cost to the custodial parent in which the child resides, the court or the jury may allocate such costs or an amount equivalent to such costs by deviation from the presumptive amount of child support, taking into consideration the circumstances of the respective parents and the best interest of the child.
(I) Permanency plan or foster care plan. In cases where the child is in the legal custody of the Department of Human Services, the child protection or foster care agency of another state or territory, or any other child-caring entity, public or private, the court or the jury may consider a deviation from the presumptive amount of child support if the deviation will assist in accomplishing a permanency plan or foster care plan for the child that has a goal of returning the child to the parent or parents and the parent's need to establish an adequate household or to otherwise adequately prepare herself or himself for the return of the child clearly justifies a deviation for this purpose.
(J) Extraordinary expenses. The child support obligation table includes average child rearing expenditures for families given the parents' combined adjusted income and number of children. Extraordinary expenses are in excess of average amounts estimated in the child support obligation table and are highly variable among families. Extraordinary expenses shall be considered on a case-by-case basis in the calculation of support and may form the basis for deviation from the presumptive amount of child support so that the actual amount of such expense is considered in the final order for only those families actually incurring the expense. Extraordinary expenses shall be prorated between the parents by assigning or deducting credit for actual payments for extraordinary expenses.
(i) Extraordinary educational expenses. Extraordinary educational expenses may be a basis for deviation from the presumptive amount of child support. Extraordinary educational expenses include, but are not limited to, tuition, room and board, lab fees, books, fees, and other reasonable and necessary expenses associated with special needs education or private elementary and secondary schooling that are appropriate to the parent's financial abilities and to the lifestyle of the child if the parents and the child were living together.
(I) In determining the amount of deviation for extraordinary educational expenses, scholarships, grants, stipends, and other cost-reducing programs received by or on behalf of the child shall be considered; and
(II) If a deviation is allowed for extraordinary educational expenses, a monthly average of the extraordinary educational expenses shall be based on evidence of prior or anticipated expenses and entered on the Child Support Schedule E -Deviations.
(ii) Special expenses incurred for child rearing. Special expenses incurred for child rearing, including, but not limited to, quantifiable expense variations related to the food, clothing, and hygiene costs of children at different age levels, may be a basis for a deviation from the presumptive amount of child support. Such expenses include, but are not limited to, summer camp; music or art lessons; travel; school sponsored extracurricular activities, such as band, clubs, and athletics; and other activities intended to enhance the athletic, social, or cultural development of a child but not otherwise required to be used in calculating the presumptive amount of child
support as are health insurance premiums and work related child care costs. A portion of the basic child support obligation is intended to cover average amounts of special expenses incurred in the rearing of a child. In order to determine if a deviation for special expenses is warranted, the court or the jury shall consider the full amount of the special expenses as described in this division; and when these special expenses exceed 7 percent of the basic child support obligation, then the additional amount of special expenses shall be considered as a deviation to cover the full amount of the special expenses.
(iii) Extraordinary medical expenses. In instances of extreme economic hardship involving extraordinary medical expenses not covered by insurance, the court or the jury may consider a deviation from the presumptive amount of child support for extraordinary medical expenses. Such expenses may include, but are not limited to, extraordinary medical expenses of the child or a parent of the child; provided, however, that any such deviation:
(I) Shall not act to leave a child unsupported; and
(II) May be ordered for a specific period of time measured in months.
When extraordinary medical expenses are claimed, the court or the jury shall consider the resources available for meeting such needs, including sources available from agencies and other adults.

## $(K)$ Parenting time.

(i) The child support obligation table is based upon expenditures for a child in intact households. The court may order or the jury may find by special interrogatory a deviation from the presumptive amount of child support when special circumstances make the presumptive amount of child support excessive or inadequate due to extended parenting time as set forth in the order of visitation, the child residing with both parents equally, or visitation rights not being utilized.
(ii) If the court or the jury determines that a parenting time deviation is applicable, then such deviation shall be included with all other deviations.
(iii) In accordance with subsection (d) of Code Section 19-11-8, if any action or claim for parenting time or a parenting time deviation is brought under this subparagraph, it shall be an action or claim solely
between the custodial parent and the noncustodial parent, and not any third parties, including child support services.
(3) Nonspecific deviations. Deviations from the presumptive amount of child support may be appropriate for reasons in addition to those established under this subsection when the court or the jury finds it is in the best interest of the child.

## (j) Involuntary loss of income.

(1) In the event a parent suffers an involuntary termination of employment, has an extended involuntary loss of average weekly hours, is involved in an organized strike, incurs a loss of health, becomes incarcerated, or similar involuntary adversity resulting in a loss of income of 25 percent or more, then the portion of child support attributable to lost income shall not accrue from the date of the service of the petition for modification, provided that service is made on the other parent. It shall not be considered an involuntary termination of employment if the parent has left the employer without good cause in connection with the parent's most recent work.
(2) In the event a modification action is filed pursuant to this subsection, the court shall make every effort to expedite hearing such action.
(3) The court may, at its discretion, phase in the new child support award over a period of up to one year with the phasing in being largely evenly distributed with at least an initial immediate adjustment of not less than 25 percent of the difference and at least one intermediate adjustment prior to the final adjustment at the end of the phase-in period.

## (k) Modification.

(1) Except as provided in paragraph (2) of this subsection, a parent shall not have the right to petition for modification of the child support award regardless of the length of time since the establishment of the child support award unless there is a substantial change in either parent's income and financial status or the needs of the child.
(2) No petition to modify child support may be filed by either parent within a period of two years from the date of the final order on a previous petition to modify by the same parent except where:
(A) A noncustodial parent has failed to exercise the court ordered visitation;
(B) A noncustodial parent has exercised a greater amount of visitation than was provided in the court order; or
(C) The motion to modify is based upon an involuntary loss of income as set forth in subsection ( j ) of this Code section.
(3) (A) If there is a difference of at least 15 percent but less than 30 percent between a new award and a Georgia child support order entered prior to January 1, 2007, the court may, at its discretion, phase in the new child support award over a period of up to one year with the phasing in being largely evenly distributed with at least an initial immediate adjustment of not less than 25 percent of the difference and at least one intermediate adjustment prior to the final adjustment at the end of the phase-in period.
(B) If there is a difference of 30 percent or more between a new award and a Georgia child support order entered prior to January 1, 2007, the court may, at its discretion, phase in the new child support award over a period of up to two years with the phasing in being largely evenly distributed with at least an initial immediate adjustment of not less than 25 percent of the difference and at least one intermediate adjustment prior to the final adjustment at the end of the phase-in period.
(C) All child support service's case reviews and modifications shall proceed and be governed by Code Section 19-11-12. Subsequent changes to the child support obligation table shall be a reason to request a review for modification from child support services to the extent that such changes are consistent with the requirements of Code Section 19-11-12.
(4) A petition for modification shall be filed under the same rules of procedure applicable to divorce proceedings. The court may allow, upon motion, the temporary modification of a child support order pending the final trial on the petition. An order granting temporary modification shall be subject to revision by the court at any time before the final trial. A jury may be demanded on a petition for modification but the jury shall only be responsible for determining a parent's gross income and any deviations. In the hearing upon a petition for modification, testimony may be given and evidence introduced relative to the change of circumstances, income and financial status of either parent, or in the needs of the child. After hearing both parties and the evidence, the court may modify and revise the previous judgment, in accordance with the changed circumstances, income and financial status of either parent, or in the needs of the child, if such change
or changes are satisfactorily proven so as to warrant the modification and revision and such modification and revisions are in the child's best interest. The court shall enter a written order specifying the basis for the modification, if any, and shall include all of the information set forth in paragraph (2) of subsection (c) of this Code section.
(5) In proceedings for the modification of a child support award pursuant to the provisions of this Code section, the court may award attorney's fees, costs, and expenses of litigation to the prevailing party as the interests of justice may require. Where a custodial parent prevails in an upward modification of child support based upon the noncustodial parent's failure to be available and willing to exercise court ordered visitation, reasonable and necessary attorney's fees and expenses of litigation shall be awarded to the custodial parent.
(I) Split parenting. In cases of split parenting, a worksheet shall be prepared separately by each custodial parent for each child for whom such parent is the custodial parent, and that worksheet shall be filed with the clerk of court. For each split parenting custodial situation, the court shall determine:
(1) Which parent is the obligor;
(2) The presumptive amount of child support;
(3) The actual award of child support, if different from the presumptive amount of child support;
(4) How and when the sum certain amount of child support owed shall be paid; and
(5) Any other child support responsibilities for each parent.

## (m) Worksheets.

(1) Schedules and worksheets shall be prepared by the parties for purposes of calculating the amount of child support. In child support services cases in which neither parent prepared a worksheet, the court may rely on the worksheet prepared by child support services as a basis for its order. Information from the schedules shall be entered on the child support worksheet. The child support worksheets and any schedule that was prepared for the purpose of calculating the amount of child support shall be attached to the final court order or judgment; provided, however, that any
order entered pursuant to Code Section 19-13-4 shall not be required to have such worksheets and schedules attached thereto.
(2) The child support worksheet and schedules shall be promulgated by the Georgia Child Support Commission.
(n) Child support obligation table. The child support obligation table shall be proposed by the Georgia Child Support Commission and shall be as codified in subsection (0) of this Code section.
(0) Georgia Schedule of Basic Child Support Obligations. Georgia Schedule of Basic Child Support Obligations

## SECTION IV

## ADDENDUM C

Economic Study:
Review of the Georgia Child Support Guidelines

# Review of the Georgia Child Support Guidelines 

Submitted to:<br>Georgia<br>Judicial Council<br>Administrative Office of the Courts

Points of view expressed in this document are those of the author and do not necessarily represent the official position of the Court or Commission reviewing the guidelines. The author is responsible for any errors and omissions.

The author would like to acknowledge the extraordinary effort of Superior Court Clerks and the Department of Human Services (DHS), Division of Child Support Services (DCSS) staff and administrators in obtaining the case file data. The new federal rules required a reach considerably beyond what had been done for previous reviews. The study was fortunate that the Commission staff and DCSS staff and administrators coordinated their efforts well. Special thanks goes to Pat Buonodono, Elaine Johnson, and Bruce Shaw, of the Judicial Council, Administrative Office of the Courts and staff to the Georgia Commission on Child Support, and to Erica Thornton, Ryan Bradley and Kurt Bryan of the DHS/DCSS.

In addition, the author would like to thank Lana Hearne and Nancy Thoennes, both of Center for Policy Research, for helpful comments and data analysis.

## Section 1: Purpose and Background

Georgia is reviewing its child support guidelines. Federal regulation (Title 45 of the Code of Federal Regulations, C.F.R. § 302.56) requires states to review their guidelines at least once every four years. As part of that review, states must consider economic data on the cost of raising children, examine case file data to analyze the application and deviation from the guidelines, consider labor market data, and fulfill other requirements.

This report documents Georgia's fulfillment of these federal requirements. The information will be considered by the Commission reviewing the guidelines. State statute (O.C.G.A. §19-6-50) also requires that the guidelines be reviewed at least once every four years and charges the Commission with determining the appropriateness of the guidelines. Not only is the Commission considering the information in this report but will also be considering information from many other sources. The Commission will submit its findings and any recommendations to the Georgia legislature. Ultimately, any changes to the child support guidelines are made through the legislative process.

The Georgia child support guidelines are set in state statute (O.C.G.A. §19-6-15) and are to be used by all judges and officials who can establish or modify a child support order within the state.

## Georgia Children and Their Parents

Child support is an important source of income to many Georgia children. Based on the U.S. Census American Community Survey, there were 2,510,610 children living in Georgia in 2016. ${ }^{1}$ The 2018 Kids Count profile of Georgia children reports several statistics relevant to child support based on 2016 data. ${ }^{2}$

- 39 percent of Georgia children lived in single-parent families;
- 23 percent of Georgia children lived at or below poverty;
- 29 percent of Georgia children have parents who lack secure employment;
- 32 percent of Georgia children are living in a household with a high housing cost burden; ${ }^{3}$ and
- 6 percent of Georgia children lack health insurance.

In 2017, the Division of Child Support Services (DCSS) of the Georgia Department of Human Services reported 411,666 child support cases to the federal Office of Child Support Enforcement (OCSE). ${ }^{4}$ DCSS collected and distributed almost $\$ 700$ million in child support in 2017. There are also an unknown

[^0]number of child support orders and collections that are not part of the DCSS's caseload or collected through DCSS. These are referred to as "private cases."

Although state data are not available, a 2010 national study found that without child support, the child poverty rate would be 4.4 percentage points more. ${ }^{5}$ Nonetheless, other national research finds that 24 percent of nonresidential parents live in poverty. ${ }^{6}$ In other words, many parents obligated to pay support have limited ability to pay.

## Current Georgia Schedule

At the core of the Georgia guidelines calculation is a schedule of basic support obligations. Exhibit 1 provides an excerpt of the existing schedule. The support obligation is determined by prorating the obligated parent's share of the basic obligation from the schedule. For example, if the income of the obligated parent is $\$ 2,000$ per month and the income of the parent receiving support is $\$ 1,500$ per month, the combined monthly income is $\$ 3,500$ per month. The basic obligation for a combined monthly income of $\$ 3,500$ for one child, based on Exhibit 1, is $\$ 702$ per month. This reflects economic data on how much parents spend on the child together, if they lived in the same household and shared financial resources. The amount for which each parent is financially responsible is based on that parent's prorated share of the basic obligation ( $\$ 702$ in this scenario). The obligor's prorated share is 57 percent (i.e., $\$ 2,000$, which is the obligated parent's income, divided by $\$ 3,500$, which is the combined income). Hence, the obligor's prorated share of the basic obligation is $\$ 400$ per month ( $57 \%$ multiplied by $\$ 702$ ). This is the basis of the child support obligation, although there may be additional adjustments for other considerations such as work-related childcare expenses or when

| Exhibit 1: Excerpt from the <br> Schedule of Basic Support Obligations |  |  |  |
| ---: | ---: | ---: | ---: |

[^1]
## Previous Guidelines Reviews and Basis of Existing Schedule

The Georgia guidelines were last reviewed in 2014. They were also reviewed quadrennially since the guidelines were enacted in the late 1980s. The existing schedule is based on economic data available in 2005, which was developed for Georgia's switch from a percentage-of-obligor income guidelines model to the income shares model in the same year.

Each guidelines review conducted since 2005 has fulfilled the federal requirement to review economic data on the cost of raising children. For the first post-2005 review, Georgia's economy (and the nation's economy) was still suffering from the lingering effects of the Great Recession that ended in 2009. This is one reason for not updating the schedule at that time. Subsequent reviews have found that the Georgia schedule was generally within the range of credible measurements of child-rearing expenditures. (As discussed in more detail in Section 3, there are more than one study of child-rearing expenditures and they do not all yield the exact same amount because of differences in the data years analyzed and the methodologies used to separate the child's share of expenditures from total household expenditures.) In addition, past reviews have found that the Georgia schedule was higher than the schedules of many of its bordering states-albeit, several of the bordering states are based on old economic data. For these reasons and others, the schedule has not been updated since 2005.

## Summary of Assumptions and Economic Data Underlying Existing Schedule

The major assumptions underlying the existing schedule are listed below.

- Georgia bases its child support guidelines on the income shares model.
- The existing schedule is based on the average of two measurements of child-rearing expenditures: one based on the "Rothbarth" methodology and the other based on the "Engel" methodology. (An economic methodology is necessary to separate the children's share from the adults' share of total family expenditures.) Economists generally believe that the Rothbarth methodology understates actual child-rearing expenditures, while the Engel methodology overstates actual child-rearing expenditures. The 2005 Commission believed that an average of the Rothbarth and Engel estimates is a close approximation of the actual amount of child-rearing expenditures. Both the Engel and Rothbarth measurements used to develop the existing Georgia schedule are from a 2001 study by Professor David Betson, University of Notre Dame using 1996-99 expenditures data from families. ${ }^{7}$
- The schedule relies on 2005 price levels and 2005 federal and state income tax rates and FICA.

[^2]- The schedule excludes parental expenditures for child care and the child's share of health insurance premiums and extraordinary, out-of-pocket medical expenses incurred for the children. The schedule includes ordinary, out-of-pocket medical expenses of \$250 per child per year. Even healthy children are likely to incur some medical expenses over the course of the year, such as children's medicine, cough syrup, or some co-pays. Georgia guidelines provides that the actual amount spent for child care, the child's health insurance, and the child's extraordinary medical expenses be considered on a case-by-case basis in the calculation of support.
- The schedule reflects average child-rearing expenditures from ages 0 through 17 years old.
- The schedule does not incorporate a timesharing adjustment. However, the Georgia guidelines provides for a parenting-time deviation based on the court-ordered timesharing arrangement. One reason that there is not a standard adjustment is that the custodial parent's child-rearing expenditures are not always reduced when the obligated parent is exercising physical custody or visitation. This fact is illustrated by considering the housing expenses incurred for a child (e.g., an extra bedroom and electricity for that bedroom). These housing expenses are not always reduced when the child is in the care of the obligated parent.

## Income Shares Model

The income shares model is based on the premises that both parents should share financially responsibility for child-rearing expenditures and that the child should be entitled to the same level of expenditures that the child would have received had the parents lived together and combined financial resources. To this end, the core of the income shares model is a measurement of child-rearing expenditures in two-parent families. That amount is often adjusted in a guidelines worksheet for current realities such as a party may also have to support dependents from another relationship or share physical custody.

The guidelines model used by a state is a policy decision. ${ }^{8}$ As of 2018, there are 41 states, including Georgia, that rely on the income shares model. In the past two decades, six states have changed guidelines models, and all six states adopted the income shares model. The income shares model was developed through the 1983-1987 National Child Support Guidelines, which was convened by the Federal Office of Child Support Enforcement (OCSE) to fulfill a congressional request. At the time, most states did not have statewide child support guidelines. The architect of the income shares model

[^3]designed it to relate to measurements of child-rearing expenditures and to fulfill the guidelines principles identified by the project's oversight committee, which included a wide range of stakeholders. Examples of some of the principles are the financial responsibility of the children should be shared by the parents who have legal responsibility for the children; child support guidelines should at least cover a child's basic needs, but the child should also share a higher standard of living enjoyed by a parent; the subsistence needs of each parent should be taken into consideration; and each child of a given parent should have a right to that parent's income. One of the major principles is that the child support obligation should allow the children to benefit from the same level of expenditures had the children and both parents lived together. The principle applies to children of divorcing and separating parents, as well as never-married parents. In other words, children are treated the same regardless of their parents' decisions to marry, divorce, separate, or never marry.

## Organization of Report

Section 2 summarizes federal requirements of state guidelines, including new ones that were imposed in December 2016. Georgia, through Senate Bill 427 of the 2017-2018 Regular Session of the Georgia General Assembly, ${ }^{9}$ has already made several revisions to comport with new federal requirements.

Section 3 reviews the economic evidence on the cost of raising children and develops an updated schedule.

Section 4 reviews case file data, labor market data and other data.
Section 5 assesses the current schedule using the current economic evidence of child-rearing expenditures, case file data, labor market data and comparisons to bordering states.

Section 6 provides conclusions and summarizes major findings.

[^4]
## Section 2: Federal Requirements of State Guidelines

The federal rules requiring statewide guidelines and the periodic review of child support guidelines were expanded in December 2016. ${ }^{10}$ Commonly called the Modernization Rule (MR), the new guidelines requirements are shown in Exhibit 2.

Essentially, prior to the MR, states were required to:

- Have one set of guidelines to be used by judges (and all persons within a state with the authority) to issue a child support order;
- Consider all earnings and income of the noncustodial parent in the calculation of support;
- Provide for the child's healthcare coverage; and
- Review their guidelines at least once every four years.

Georgia has always fulfilled these requirements.

## Expanded Federal Requirements of State Guidelines

The previous requirements are still in place. Exhibit 2 shows excerpts of the expanded federal requirements pertinent to state guidelines. The MR requirements become effective a year after a state's next review (see § 302.56(a)).

Exhibit 2: Federal Requirements Pertaining to Child Support Guidelines under the Modernization Rule (§ 302.56)
(a) Within 1 year after completion of the State's next quadrennial review of its child support guidelines, that commences more than 1 year after publication of the final rule, in accordance with $\S 302.56(\mathrm{e})$, as a condition of approval of its State plan, the State must establish one set of child support guidelines by law or by judicial or administrative action for setting and modifying child support order amounts within the State that meet the requirements in this section.
(b) The State must have procedures for making the guidelines available to all persons in the State.
(c) The child support guidelines established under paragraph (a) of this section must at a minimum:
(1) Provide that the child support order is based on the noncustodial parent's earnings, income, and other evidence of ability to pay that:
(i) Takes into consideration all earnings and income of the noncustodial parent (and at the State's discretion, the custodial parent);
(ii) Takes into consideration the basic subsistence needs of the noncustodial parent (and at the State's discretion, the custodial parent and children) who has a limited ability to pay by incorporating a low-income adjustment, such as a self-support reserve or some other method determined by the State; and
(iii) If imputation of income is authorized, takes into consideration the specific circumstances of the noncustodial parent (and at the State's discretion, the custodial parent) to the extent known, including such factors as the noncustodial parent's assets, residence, employment and earnings history, job skills, educational attainment, literacy, age, health, criminal record and other employment barriers, and record of seeking work, as well as the local job

[^5]market, the availability of employers willing to hire the noncustodial parent, prevailing earnings level in the local community, and other relevant background factors in the case.
(2) Address how the parents will provide for the child's health care needs through private or public health care coverage and/or through cash medical support;
(3) Provide that incarceration may not be treated as voluntary unemployment in establishing or modifying support orders; and
(4) Be based on specific descriptive and numeric criteria and result in a computation of the child support obligation.
(d) The State must include a copy of the child support guidelines in its State plan.
(e) The State must review, and revise, if appropriate, the child support guidelines established under paragraph (a) of this section at least once every four years to ensure that their application results in the determination of appropriate child support order amounts. The State shall publish on the internet and make accessible to the public all reports of the guidelines reviewing body, the membership of the reviewing body, the effective date of the guidelines, and the date of the next quadrennial review.
(h) As part of the review of a State's child support guidelines required under paragraph (e) of this section, a State must:
(1) Consider economic data on the cost of raising children, labor market data (such as unemployment rates, employment rates, hours worked, and earnings) by occupation and skill-level for the State and local job markets, the impact of guidelines policies and amounts on custodial and noncustodial parents who have family incomes below 200 percent of the Federal poverty level, and factors that influence employment rates among noncustodial parents and compliance with child support orders;
(2) Analyze case data, gathered through sampling or other methods, on the application of and deviations from the child support guidelines, as well as the rates of default and imputed child support orders and orders determined using the lowincome adjustment required under paragraph (c)(1)(ii) of this section. The analysis must also include a comparison of payments on child support orders by case characteristics, including whether the order was entered by default, based on imputed income, or determined using the low-income adjustment required under paragraph (c)(1)(ii). The analysis of the data must be used in the State's review of the child support guidelines to ensure that deviations from the guidelines are limited and guideline amounts are appropriate based on criteria established by the State under paragraph (g); and
(3) Provide a meaningful opportunity for public input, including input from low-income custodial and noncustodial parents and their representatives. The State must also obtain the views and advice of the State child support agency funded under title IV-D of the Act.

Other Provisions of the New Federal Rule that Indirectly affect Low-Income Provisions of State Guidelines §303.4
Establishment of support obligations. (b) Use appropriate State statutes, procedures, and legal processes in establishing and modifying support obligations in accordance with $\S 302.56$ of this chapter, which must include, at a minimum: (1) Taking reasonable steps to develop a sufficient factual basis for the support obligation, through such means as investigations, case conferencing, interviews with both parties, appear and disclose procedures, parent questionnaires, testimony, and electronic data sources; (2) Gathering information regarding the earnings and income of the noncustodial parent and, when earnings and income information is unavailable or insufficient in a case gathering available information about the specific circumstances of the noncustodial parent, including such factors as those listed under $\S 302.56$ (c)(1)(iii) of this chapter; (3) Basing the support obligation or recommended support obligation amount on the earnings and income of the noncustodial parent whenever available. If evidence of earnings and income is unavailable or insufficient to use as the measure of the noncustodial parent's ability to pay, then the support obligation or recommended support obligation amount should be based on available information about the specific circumstances of the noncustodial parent, including such factors as those listed in §302.56(c)(1)(iii) of this chapter. (4) Documenting the factual basis for the support obligation or the recommended support obligation in the case record.
$\S 303.8$ Review and adjustment of child support orders. *****(b) * ** (2) The State may elect in its State plan to initiate review of an order, after learning that a noncustodial parent will be incarcerated for more than $\mathbf{1 8 0}$ calendar days, without the need for a specific request and, upon notice to both parents, review, and if appropriate, adjust the order, in accordance with paragraph (b)(1)(i) of this section. ${ }^{* * * * *}$ (7) The State must provide notice- (i) Not less than once every 3 years to both parents subject to an order informing the parents of their right to request the State to review and, if appropriate, adjust the order consistent with this section. The notice must specify the place and manner in which the request should be made. The initial notice may be included in the order. (ii) If the State has not elected paragraph (b)(2) of this section, within 15 business days of when the IV-D agency learns that a noncustodial parent will be incarcerated for more than 180 calendar days, to both
parents informing them of the right to request the State to review and, if appropriate, adjust the order, consistent with this section. The notice must specify, at a minimum, the place and manner in which the request should be made. Neither the notice nor a review is required under this paragraph if the State has a comparable law or rule that modifies a child support obligation upon incarceration by operation of State law. (c) *** Such reasonable quantitative standard must not exclude incarceration as a basis for determining whether an inconsistency between the existing child support order amount and the amount of support determined as a result of a review is adequate grounds for petitioning for adjustment of the order.

## Assessment of Georgia's Compliance with Expanded Federal Requirements

The expanded MR requirements are grouped into nine requirements for organizational purposes. Each is discussed in context of Georgia's current approach including recent changes resulting from SB427, that became effective July 1, 2018. In all, Georgia appears to be compliant with each of them. The assessment is limited to provisions that are in the Georgia guidelines and does not include provisions in other sections of statute, case law, or general practices. The discussion also compares Georgia's provisions and practices to those of other states when appropriate. ${ }^{11}$

## MR Requirements of State Guidelines

1. Take into the consideration the obligated parent's ability to pay through a self-support reserve (SSR) or another mechanism.

Georgia appears to fulfill this requirement through the new provision adopted through SB427 (which is shown in Exhibit 3) that explicitly provides that the noncustodial parent's subsistence needs may be considered.

Exhibit 3: Excerpts from Guidelines And SB427 that Address the Obligated Parent's Subsistence needs

## O.C.G.A. §19-6-15(i)(2)(B)

(B) Low income.
(i) If the noncustodial parent can provide evidence sufficient to demonstrate no earning capacity or that his or her pro rata share of the presumptive amount of child support would create an extreme economic hardship for such parent, the court may consider a low-income deviation.
(ii) A noncustodial parent whose sole source of income is supplemental security income received under Title XVI of the federal Social Security Act shall be considered to have no earning capacity.
(iii) The court or the jury shall examine all attributable and excluded sources of income, assets, and benefits available to the noncustodial parent and may consider all reasonable expenses of the noncustodial parent, ensuring that such expenses are actually paid by the noncustodial parent and are clearly justified expenses.
(iv) In considering a request for a low-income deviation, the court or the jury shall then weigh the income and all attributable and excluded sources of income, assets, and benefits and all reasonable expenses of each parent, the relative hardship that a reduction in the amount of child support paid to the custodial parent would have on the custodial parent's household, the needs

[^6]of each parent, the needs of the child for whom child support is being determined, and the ability of the noncustodial parent to pay child support.
(v) Following a review of the noncustodial parent's gross income and expenses, and taking into account each parent's basic child support obligation adjusted by health insurance and work related child care costs and the relative hardships on the parents and the child, the court or the jury, upon request by either party or upon the court's initiative, may consider a downward deviation to attain an appropriate award of child support which is consistent with the best interest of the child.
(vi) For the purpose of calculating a low-income deviation, the noncustodial parent's minimum child support for one child shall be not less than $\$ 100.00$ per month, and such amount shall be increased by at least $\$ 50.00$ for each additional child for the same case for which child support is being ordered.
(vii) A low-income deviation granted pursuant to this subparagraph shall apply only to the current child support amount and shall not prohibit an additional amount being ordered to reduce a noncustodial parent's arrears.
(viii) If a low-income deviation is granted pursuant to this subparagraph, such deviation shall not prohibit the court or jury from granting an increase or decrease to the presumptive amount of child support by the use of any other specific or nonspecific deviation.

SB427
Said Code section is further amended by revising subparagraph (i)(1)(A) and division169 (i)(2)(B)(iii) as follows:
"(A) The amount of child support established by this Code section and the presumptive amount of child support are rebuttable and the court or the jury may deviate from the presumptive amount of child support in compliance with this subsection. In deviating from the presumptive amount of child support, primary-consideration shall be given to174 the best interest of the child for whom support under this Code section is being determined. A nonparent custodian's expenses may be the basis for a deviation as well as a noncustodial parent's ability or inability to pay the presumptive amount of child support."
"(iii) The court or the jury shall examine all attributable and excluded sources of income, assets, and benefits available to the noncustodial parent and may consider the noncustodial parent's basic subsistence needs and all of his or her reasonable expenses of the noncustodial parent, ensuring that such expenses are actually paid by the noncustodial parent and are clearly justified expenses."

Georgia's approach is unique. The only other state similar to Georgia's is North Dakota. Both Georgia and North Dakota provide that the obligated parent's subsistence needs can be considered as a deviation factor and neither state provides a dollar definition (i.e., sum-certain amount) of subsistence. In contrast, most states provide a presumptive low-income adjustment; ${ }^{12}$ and, use a self-support reserve (SSR) and provide for it as a dollar amount. A common approach is to relate it the to the federal poverty guidelines (FPG) for one person, which is $\$ 1,012$ per month in 2018. If the parent's income is below the SSR, a state-determined minimum order is applied. If the parent's income is just above the statedetermined SSR, the final order may also be set at less than the guidelines-determined amount before application of that state's SSR or low-income adjustment. The additional adjustment will occur if the parent's income after paying the guidelines-determined amount is less than the state-determined SSR.

Several states use more or less than 100 percent of the FPG as their SSR. Most states that use less have not updated their guidelines. A notable exception is Illinois, which just switched to the income shares model. Illinois uses 70 percent of the FPG as its SSR. Ohio's new guidelines will use 115 percent, Minnesota uses 120 percent, and New York uses 135 percent (which is the highest percentage of FPG

[^7]used). The rationale of using a higher percentage is to account for taxes or approximate the income thresholds used for public assistance benefits, which are also often set above 100 percent of FPG. Arizona just adopted a self-support reserve equivalent to 80 percent of full-time earnings at Arizona's minimum wage. Since Arizona's current minimum wage is $\$ 10.50$ per hour, this yields a SSR of $\$ 1,456$ per month. In contrast, West Virginia uses a SSR of \$500 per month, which is one of the lowest among state guidelines.

The MR also gives states the option to provide each parent a SSR. Few income shares states have adopted SSRs for both parents. All Melson formula states (i.e., Delaware, Hawaii, and Montana) essentially provide each parent with a SSR. Ohio, an income shares state, will be providing a SSR for each parent in its new guidelines worksheet. (The Ohio legislature just passed guidelines changes that that will become effective in 2019. The changes include charging the agency with periodic updates to the guidelines schedule and worksheet.) Under the new Ohio guidelines, if the obligated parent's income is below the SSR, the minimum order will always apply. This is regardless of the amount of the updated schedule. Exhibit 4 illustrates how the SSR can be applied to each parent.

Exhibit 4: Illustration of How the SSR Can Be Applied to Both Parents when Parent A Is the Obligated Parent

| Lines from the Worksheet | Parent A | Parent B | Combined |
| :--- | :---: | :---: | :---: |
| Line 1. Monthly Gross Income | $\$ 1,257$ | $\$ 1,257$ | $\$ 2,514$ |
| Line 2: Percentage Share of Income | $50 \%$ | $50 \%$ |  |
| Line 3: Basic Child Support Obligation <br> (table amt for 2 children) |  |  | $\$ 752$ |
| Line 4: Pro Rata Basic Support Obligation | $\$ 376$ | $\$ 376$ |  |
| Line 5: Self-Support Reserve (\$1,012/mo) | $\$ 1,012$ | $\$ 1,012$ |  |
| Line 6: Income Available for Support (Line 1 minus above <br> line 5) | $\$ 245$ | $\$ 245$ |  |
| Line 7. Preliminary Child Support Obligation <br> (Lower of Line 4 and Line 6 for Obligated Parent only) | $\$ 245$ |  |  |
| Line 8. Minimum Order (\$150 for 2 children) | $\$ 150$ | $\$ 245$ |  |
| Line 9: Final Order Amount (higher of Line 7 and Line 8 <br> for obligated parent only) |  |  |  |

2. When income imputation is authorized, take into consideration the specific circumstances of the noncustodial parent, such as employment and earnings history, criminal record and other factors listed in Exhibit 2.
3. Provide that incarceration may not be treated as voluntary unemployment in establishing or modifying support orders.

These requirements are discussed together because they both pertain to income imputation. The proposed rule documents the evidence supporting these new requirements. ${ }^{13}$ They are grounded in research that finds compliance is lower when income is imputed and unpayable arrears accrue among incarcerated parents. They also recognize the importance of healthy parent-child relationships in the development of children and how unpaid child support in some situations can adversely affect that healthy relationship. The new rules particularly aim to improve the situations of low-income parents with limited ability to pay and their children.

As shown in Exhibit 5, the guidelines changes resulting from SB427 conform to the MR requirements.

## Exhibit 5: Excerpts from SB427 that Address Income Imputation

SB427
Said Code section is further amended by revising subparagraph (i)(1)(A) and division169 (i)(2)(B)(iii) as follows:
"(A) Imputed income. When establishing the amount of child support, if a parent fails to produce reliable evidence of income, such as tax returns for prior years, check stubs, or other information for determining current ability to pay child support or ability to pay85 child support in prior years, and the court or the jury has no other reliable evidence of the parent's income or income potential, gross income for the current year shall be determined by imputing gross income basedon a-40-hour workweek at minimum wage-may be imputed. When imputing income, the court shall take into account the specific circumstances of the parent to the extent known, including such factors as the parent's assets, residence, employment and earnings history, job skills, educational attainment, literacy, age, health, criminal record and other employment barriers, and record of seeking work, as well as the local job market, the availability of employers willing to hire the parent, prevailing earnings level in the local community, and other relevant background factors in the case. If a parent is incarcerated, the court shall not assume95 an ability for earning capacity based upon pre-incarceration wages or other employment related income, but income may be imputed based upon the actual income and assets available to such incarcerated parent.
"(D) Willful or voluntary unemployment or underemployment. In determining whether a parent is willfully or voluntarily unemployed or underemployed, the court or the jury shall ascertain the reasons for the parent's occupational choices and assess the reasonableness of these choices in light of the parent's responsibility to support his or her child and whether such choices benefit the child. A determination of willful or voluntary unemployment or underemployment shall not be limited to occupational choices motivated only by an intent to avoid or reduce the payment of child support but can be based on any intentional choice or act that affects a parent's income. A determination of willful or voluntary unemployment or underemployment shall not be made when an individual's incarceration prevents employment. In determining willful or voluntary unemployment or underemployment, the court may examine whether there is a substantial likelihood that the parent could, with reasonable effort, apply his or her education, skills, or training to produce income. Specific factors for the court to consider when determining willful or voluntary unemployment or underemployment include, but are not limited to:"

Similar to Georgia, states that have already adopted conforming changes have simply applied the language of the MR. One notable difference is that some states (e.g., Arizona and North Dakota) continue to provide for income imputation at full-time minimum wage or a higher amount. The specification is essentially provided as a last resort.

[^8]4. Address how the parents will provide for the child's health care needs through private or public health care coverage and/or through cash medical support.

Exhibit 6 shows how the requirement pertaining to the child's health care needs was expanded in the new federal requirements using underlined text to show additions and strikeout text to show deletions.

Exhibit 6: Strike-out Version of the MR Pertaining to Medical Child Support in State Child Support Guidelines
§ 302.56 Guidelines for setting child support awards.
(3) (2) Address how the parents will provide for the child(ren)'s child's health care needs through private or public health insurance care coverage and/or through cash medical support in accordance with § 303.31 of this chapter.;
§303.31 Securing and enforcing medical support obligations.
(a) *** (2) Health insurance-care coverage includes fee for service, health maintenance organization, preferred provider organization, and other types of private health insurance and public health care coverage which is available to either parent, under which medical services could be provided to the dependent child(ren).
(3) Cash medical support or the cost of private health insurance is considered reasonable in cost if the cost to the parent responsible for providing medical support does not exceed five percent of his or her gross income or, at State option, a reasonable alternative income-based numeric standard defined in State law, regulations or court rule having the force of law or State child support guidelines adopted in accordance with § 302.56(c) of this chapter. In applying the five percent or alternative State standard for the cost of private health insurance, the cost is the cost of adding the child(ren) to the existing eoverage or the difference between self only and family coverage.
(b) *** (1) Petition the court or administrative authority to:
(i) Include private-health insurance care coverage that is accessible to the child(ren), as defined by the State, and is available to the parent responsible for providing medical support and can be obtained for the child at reasonable cost, as defined under paragraph (a)(3) of this section, in new or modified court or administrative orders for support; and
(ii) Allocate the cost of coverage between the parents.
(2) If private-health insurance care coverage described in paragraph (b)(1) of this section is not available at the time the order is entered or modified, petition to include cash medical support in new or modified orders until such time as health insurance care coverage, that is accessible and reasonable in cost as defined under paragraph (a)(3) of this section, becomes available. In appropriate cases, as defined by the State, cash medical support may be sought in addition to health insurance care coverage.
(3) Establish writtencriteria, which are reflected in a record, to identify orders that do not address the health care needs of children based on-
(i) Evidence that private health insurance care coverage may be available to either parent at reasonable cost, as defined under paragraph (a)(3) of this section; and *****

It also shows another section of the MR that directs the IV-D agency to define public health coverage (i.e., Medicaid and CHIP) as health care coverage. SB427, as shown in the textbox, makes conforming changes

> "(iii) Eligibility for or enrollment of the child in Medicaid, or the PeachCare for Kids Program, or other publichealth care program shall not satisfy the requirement that the final chiths support order provide for the child's health care needs. Health coverage through Medicaid, the PeachCare for Kids Program and Necticaid or other public health care program shall not prevent a court from also ordering either or both parents to obtain other health insurance for the child. to the guidelines to reflect that public health coverage is indeed health care coverage.

## 5. Consider economic data on the cost of raising children.

The Georgia child support schedule, like most state guidelines schedules, is based on economic data on the cost of raising children. New economic data is provided in Section 3. In other words, this federal requirement is easily met.
6. Consider labor market data, hours worked, and other factors; and the impact of the guidelines policies on low-income parents.

These requirements are met in Section 4, which includes an analysis of labor market data, and Section 5 that assesses the appropriateness of the guidelines schedule and considers low-income case examples.
7. Analyze case file data, gathered through sampling or other methods, on the guidelines application, guidelines deviation, rates of default and imputed orders, and payment patterns.

Georgia has always met this requirement as part of its guidelines reviews. The analysis of case file data for the 2018 review is summarized in Section 4.
8. Provide meaningful opportunity for public input, particularly from the IV-D agency and lowincome parents.

CPR knows of no states that do not provide opportunity for public comment. Typically, a state may offer public hearings or provide opportunity for public comment via the Internet. Most states include IV-D agency and low-income parent representation on their guidelines review committee or reach out to the IV-D agency and the low-income community (e.g., Legal Aide) for public comment. Georgia certainly has a history of that. It is also common for states to reach out to judges and the family law section of the state bar association.
9. Publish the guidelines review on the Internet, list commission members, and provide dates of next review.

Georgia already publishes its guidelines review reports on the Internet, as required by state statute (See Exhibit 7). The reports list the Commission members. In all, Georgia statute provides more guidance for its guidelines review process than most states. Nonetheless, Georgia may want to tweak it to ensure all of the MR provisions are met through it or task Commission staff with ensuring these nuances are met.

```
Exhibit 7: Selected Provisions pertaining to Georgia's Guidelines Review
```

§ 19-6-51. Members; terms; chairperson, other officers, and committees; staffing and funding
(a) The Georgia Child Support Commission shall be composed of 15 members. The Governor shall appoint all of the members as follows:
(1) Three members who shall be judges in a superior court;
(2) One member who shall be a Justice of the Supreme Court of Georgia or a Judge of the Georgia Court of Appeals or the Justice's or Judge's designee;
(3) Two members of the House of Representatives and two members of the Senate; and
(4) Seven other members.

Each member of the Commission shall be appointed to serve for a term of four years or until his or her successor is duly appointed except the members of the General Assembly, who shall serve until completion of their current terms of office. The initial members of the Commission appointed pursuant to paragraph (1) of this subsection shall serve for terms of three years. The initial member of the Commission appointed pursuant to paragraph (2) of this subsection shall serve for a term of four years. The initial members of the Commission appointed pursuant to paragraph (4) of this subsection shall serve for terms of two years. The initial members of the Commission shall be appointed not later than May 22, 2005, and shall serve until their terms expire. The succeeding members of the Commission shall begin their terms of office on July 1 of the year in which appointed. A member may be appointed to succeed himself or herself on the Commission. If a member of the Commission is an elected official, he or she shall be removed from the Commission if he or she no longer serves as an elected official.
(b) The Governor shall designate the chairperson of the Commission. The Commission may elect other officers as deemed necessary. The chairperson of the Commission may designate and appoint committees from among the membership of the Commission as well as appoint other persons to perform such functions as he or she may determine to be necessary as relevant to and consistent with this article. The chairperson shall only vote to break a tie.
(c) The Commission shall be attached for administrative purposes only to the Department of Human Services. The Department of Human Services shall provide staff support for the Commission. The Department of Human Services shall use any funds specifically appropriated to it to support the work of the Commission.
§ 19-6-53. Duties; powers; authorization to retain professional services
(a) The Commission shall have the following duties:
(1) To study and evaluate the effectiveness and efficiency of Georgia's child support guidelines;
(2) To evaluate and consider the experiences and results in other states which utilize child support guidelines;
(3) To create and recommend to the General Assembly a child support obligation table consistent with Code Section 19-6-15;
(4) To determine periodically, and at least every four years, if the child support obligation table results in appropriate presumptive awards;
(5) To identify and recommend whether and when the child support obligation table or child support guidelines should be modified;
(6) To develop, publish in print or electronically, and update the child support obligation table and worksheets and schedules associated with the use of such table;
(7) To develop or cause to be developed software and a calculator associated with the use of the child support obligation table and child support guidelines and adjust the formula for the calculations of self-employed persons' income pursuant to applicable federal law, if the Commission determines that the calculation affects persons paying or receiving child support in this state;
(8) To develop training manuals and information to educate judges, attorneys, and litigants on the use of the child support obligation table and child support guidelines;
(9) To collaborate with the Institute for Continuing Judicial Education, the Institute of Continuing Legal Education, and other agencies for the purpose of training persons who will be utilizing the child support obligation table and child support guidelines;
(10) To make recommendations for proposed legislation;
(11) To study the appellate courts' acceptance of discretionary appeals in domestic relations cases and the formulation of case law in the area of domestic relations;
(12) To study alternative programs, such as mediation, collaborative practice, and pro se assistance programs, in order to reduce litigation in child support and child custody cases; and
(13) To study the impact of having parenting time serve as a deviation to the presumptive amount of child support and make recommendations concerning the utilization of the parenting time adjustment.
(b) The Commission shall have the following powers:
(1) To evaluate the child support guidelines in Georgia and any other program or matter relative to child support in Georgia;
(2) To request and receive data from and review the records of appropriate agencies to the greatest extent allowed by state and federal law;
(3) To accept public or private grants, devises, and bequests;
(4) To enter into all contracts or agreements necessary or incidental to the performance of its duties;
(5) To establish rules and procedures for conducting the business of the commission; and
(6) To conduct studies, hold public meetings, collect data, or take any other action the commission deems necessary to fulfill its responsibilities.
(c) The commission shall be authorized to retain the services of auditors, attorneys, financial consultants, child care experts, economists, and other individuals or firms as determined appropriate by the commission.

## Section 3: Economic Data on the Cost of Raising Children

There are several studies measuring the cost of raising children. Most state guidelines rely on studies of child-rearing expenditures that vary across a range of incomes rather than studies that examine the minimum and basic needs of children. This is because the premise of most state guidelines is that children should share in the lifestyle afforded by their parents; that is, if the obligated parent's income affords the obligated parent a higher standard of living, the support order should also be more for that higher income parent.

In all, there are nine different studies of child-rearing expenditures that form the basis of state guidelines. The studies of child-rearing expenditures underlying state guidelines vary in the age of the data used to measure child-rearing expenditures and the economic methodologies used to separate the child's share of expenditures from total expenditures of a household. As identified in Section 1, the existing Georgia schedule is based on the average of two different studies of child-rearing expenditures. One study relied on the Engel methodology and the other study relied on the Rothbarth methodology.

## Overview of Rothbarth And Engel Methodologies

When Congress first passed legislation (i.e., the Family Support Act of 1988) requiring presumptive state child support guidelines, they also mandated the U.S. Department of Health and Human Services to develop a report analyzing expenditures on children and explain how the analysis could be used to help states develop child support guidelines. This was fulfilled by two reports that were both released in 1990. One was by Professor David Betson, University of Notre Dame. ${ }^{14}$ Using five different economic methodologies to measure child-rearing expenditures, he concluded that the Rothbarth methodology was the most robust, ${ }^{15}$ hence, recommended that it be used for state guidelines.

One of the other methodologies explored by Betson was the Engel methodology. The Engel and Rothbarth methodologies are named after the economists who developed them. Both are considered marginal cost approaches; that is, they consider how much more is spent by a couple with children than a childless couple of child-rearing age. To that end, the methodologies compare expenditures of two sets of equally-well off families: one with children and one without children. The difference in expenditures between the two sets is deemed to be child-rearing expenditures. The Engel and Rothbarth methodologies use different indicators of equally well-off families. The Engel methodology uses expenditures on food, while the Rothbarth methodology relies on expenditures for adult goods to

[^9]determine equally well-off families. ${ }^{16}$ Through calculus, economists have proved that the Engel methodology's reliance on food shares overstates actual child-rearing expenditures because children are relatively food intensive. In contrast, the calculus behind using expenditures on adult goods in the Rohtbarth methodology finds that the Rothbarth estimator understates actual child-rearing expenditures because parents essentially substitute away from adult goods when they have children.

At the time of Betson's 1990 study, most states had already adopted guidelines to meet the 1987 federal requirement to have advisory child support guidelines. (The requirement was extended to be rebuttal presumptive guidelines in 1989.) Most states were using measurements of child-rearing expenditures published in 1984 by Dr. Thomas Espenshade. ${ }^{17}$ Based on the Engel methodology, the Espenshade's study formed the basis of the prototype income shares model developed through the National Child Support Guidelines project that was published in 1987. ${ }^{18}$ Today, about eight states (including Florida) still rely on Espenshade's study as the basis of their guidelines.

The second study resulting from the Congressional mandate was by Lewin/ICF. ${ }^{19}$ It recognized that economists do not agree on which methodology best measures actual child-rearing expenditures. Lewin/ICF were the first to assess the appropriateness of state guidelines by determining whether they generally were not below the lowest credible measurement of child-rearing expenditures and generally did not exceed the highest of credible measurements of child-rearing expenditures. That methodology has been used for several decades now and by several states, including Georgia, for most of their guidelines reviews. For Lewin/ICF's initial assessment, they used the Rothbarth measurements developed by Betson in his 1990 study as the lower bound.

There are no new Engel studies of child-rearing expenditures. As discussed in more detail later, there are new Rothbarth studies of child-rearing expenditures. The Rothbarth methodology is the methodology used in the measurements of child-rearing expenditures underlying most state guidelines.

## Studies underlying Current State Guidelines

Over the years, Betson has updated his Rothbarth measurements three times. ${ }^{20}$ Including his first (1990) study in the count, there are four of Betson-Rothbarth studies. For his second study, Betson also

[^10]developed measurements of child-rearing expenditures using the Engel methodology. It is the average of the Engel and Rothbarth measurements in his second study that forms the basis of the Georgia schedule. Betson did not include Engel measurements in his third and fourth study.

The majority of states (27 states), the District of Columbia, and Guam rely on one of Betson's studies of child-rearing expenditures using the Rothbarth methodology to separate the child's share of expenditures from total household expenditures. As already mentioned, about eight states rely on the Espenshade study and another six states rely on a 1981 literature review of economic studies conducted by the University of Wisconsin. ${ }^{21}$ Minnesota is the only state to rely on measurements of child-rearing expenditures developed by the United States Department of Agriculture (USDA), which produces new measurements at least every other year. New Jersey and Kansas each developed their own study of child-rearing expenditures that forms the basis of their respective guidelines. Finally, there are about six states in which the economic basis is unknown.

## New Studies of Child-Rearing Expenditures and Use in State Guidelines

In all, there are five current studies of child-rearing expenditures since 2005, which is the year that the existing Georgia schedule was developed.

- Studies by William Comanor, Professor of Economics, University of California at Santa Barbara published in various documents. ${ }^{22}$

The Betson study, the Rodgers (2017) study and the USDA study (Lino, 2017) are used in Section 5 to assess the appropriateness of the current Georgia schedule. Appendix A contains side-by-side comparisons of the current schedule to a Betson-Rothbarth (BR) schedule and a USDA schedule updated to 2018 price levels. The BR schedule is also updated to 2018 federal and state income taxes and FICA. As a consequence, the BR schedule reflects that parties have more spendable income due to 2017 federal tax reform that they can spend on children. (Due to the USDA methodology, the only way it can be updated for 2018 tax rates is to use expenditures data from families surveyed in 2018.) Appendix B provides technical documentation of how these measurements were converted to schedules for comparative purposes.

Both the 2010 BR measurements (also called BR4 for the fourth BR study) and the New Jersey study were included in the 2014 report. Among the five new studies, only the BR4 study and the New Jersey study have been adopted as the basis of a state's guidelines.

## 2010 Betson-Rothbarth Measurements

Exhibit 8 illustrates the differences in BR estimates over time for one child. The percentages exclude childcare, the child's health insurance, and the child's extraordinary medical expenses. The first three sets of $B R$ measurements (BR1, BR2, and BR3) rely on the same assumptions and methodologies, but different data years. The most recent BR measurements (BR4) included two changes in data assumptions. Earlier BR measurements consider "expenditures," while BR4 considers "expendituresoutlays." Expenditures include the purchase price (and sales tax) on any item purchased within the survey year regardless whether the item was purchased through installments. In contrast, outlays only capture what was actually paid toward that item during the survey period. So, if there were only four out of 20 installment payments made during the survey period, only those four payments are captured.

Unlike expenditures, outlays also capture mortgage principal payments, payments on second mortgages, and payments on home equity loans. Both expenditures and outlays capture interest on the first mortgage among homeowners and rent, utilities, and other housing expenses among renters. The

[^12]merit of expenditures for use in state guidelines is that it excludes mortgage principal payments. This is consistent with property settlements that have historically addressed equity in the home as part of the divorce settlement. The merit of outlays for use in state guidelines is it is a better reflection of actual family budgeting on a monthly basis.

The second difference is that Betson relied on a newly available measure of income developed by the Bureau of Labor Statistics, the organization that conducts the Consumer Expenditure Survey (CES), which is the basis of most measurements of child-rearing expenditures. (See Appendix B for more discussion about the CES.) The underreporting of income is a problem inherent to most surveys. The new measure attempts to correct underreporting, particularly at low incomes. The problem was identified from findings from earlier CES that revealed that many low-income families spend considerably more than what they report as income. The new measurement essentially bumps income for some families-hence, reducing the percentage of their income spent on child rearing.

New Jersey and California Studies by Rodgers

The New Jersey study is only used by New Jersey. It was developed by Professor William Rodgers, Rutgers University, by applying the Rothbarth methodology to expenditures data from the 2000-2011 CES and adjusted for New Jersey incomes, which are higher than the national average. Due to the income adjustment, they are not appropriate for Georgia.

In 2018, Rodgers also conducted a study for California that is not adjusted for any particular state. The findings from this study are compared later in this section to the current Georgia schedule. For this study, Rodgers applied the Rothbarth methodology to families participating in the 2000-2015 CES. One
reason he considered a larger time period was to average out the expenditure patterns since there were some anomalous patterns associated with the Great Recession of 2007-2009 and its aftermath. Rodgers concluded there were some actual dollar declines in outlays on children in recent years. In general, Rodgers found that the percentage of total household expenditures devoted to child-rearing expenditures was about three to four percentage points less than the BR4 studies. For example, the BR4 study indicates on average, 24 percent of total household expenditures are devoted to child-rearing expenditures where as Rodgers found the comparable percentage to be 20.9 percent.

## 

The Rodgers-Rothbarth measurements indicate that families, on average, devote about 3 to 4 percentage points less to childrearing expenditures than the most current Betson-Rothbarth study.

## USDA STUDY

Another study that is often considered in the review of guidelines, but has not been used to develop a state's guidelines since 2002, is conducted by the United States Department of Agriculture (USDA). The USDA updates its measurements at least biannually. Its most recent study is for 2015. Using expenditures data from the 2011 through 2015 Consumer Expenditure Survey (CES), the USDA found that average child-rearing expenses are $\$ 9,650$ to $\$ 23,090$ per year for the youngest child in a two-child family in the South in 2015. The amount varies depending on the income of the family and age of the child.

The USDA estimates child-rearing expenditures individually for several expenditure categories (e.g., food and clothing), then adds them to develop a total. As discussed more in the USDA report, a different methodology is used to measure expenditures for each category. Some categories unique to children can be measured

The USDA finds that average child-rearing expense are $\$ 9,650$ to $\$ 23,090$ per year for the youngest child in a two-child family in the South in 2015. directly (e.g., children clothing, childcare expenses and education expenses). The child's food costs are measured using the food plans developed by the USDA. The child's transportation is measured by only considering family-related activities, which are 59 percent of total transportation according to research findings. The child's housing expenses are measured from estimating the average additional costs of housing given the number of bedrooms in a home assuming more bedrooms are required when there is more than one child and controlling for income level. Food, transportation and housing comprise the vast majority of child-rearing expenditures.

Economists generally believed that the USDA's previous approach to measuring child-rearing expenditures overstated actual child-rearing expenditures, but economists have not assessed the USDA methodology since it was changed in 2008. The USDA last updated its measurements in 2014. ${ }^{23}$

## Comanor Study

Still another study, led by a University of California at Santa Barbara professor, William Comanor, has been extensively vetted by Minnesota. Arguably, the Comanor study measures the child's basic needs. It is arguable because the authors believe their methodology reflects child-rearing expenditures across all income ranges; however, it finds implausibly low amounts (i.e., food costs below what the federal government measures as the minimum amount needed to sustain) and arrives at amounts near federal poverty levels. Most states believe the child support guidelines should provide for more than a basic needs amount, if the obligated parent can afford a higher standard of living. In other words, if the obligated parent has sufficient income to enjoy a higher standard of living, the child should share in that higher standard of living. For these reasons, states often dismiss the Comanor study.

## Underlying Data Source of Economic Studies

All of the economic studies of child-rearing expenditures (including New Jersey and Kansas) rely on the Consumer Expenditure Survey (CES) ${ }^{24}$ to develop a measurement of child-rearing expenditures. Administered by the Bureau of Labor Statistics (BLS), economists use the CES because it is the most comprehensive and detailed survey conducted on household expenditures and consists of a large sample. The CES surveys about 6,000 households per quarter on expenditures, income, and household characteristics (e.g., family size). Households generally remain in the survey for five consecutive quarters, with households rotating in and out each quarter. (Just recently, this has been reduced from five quarters to four quarters.) Most economists use at least three quarters or a year of expenditures data for a surveyed family. This means that family expenditures are averaged for about a year rather than over a quarter, which may not be as reflective of typical family expenditures.

The BLS designed the CES to produce a nationally representative sample and samples representative of the four regions (Midwest, Northeast, South, and West). The sample sizes for each state, however, are not large enough to estimate child-rearing costs for families within a state. No state has seriously contemplated conducting a survey similar to the CES at a state level. The costs and time requirements would be prohibitive.

Appendix B contains more information about the CES.

[^13]
## Appropriateness of National Data to Georgia's Economy

As mentioned above, replication of the CES at the state level would be prohibitively expensive and time consuming. Instead, many states adjust the national measurements to account for their state's lower or higher cost of living. For example, Alabama, South Carolina, and West Virginia adjust national measurements for their lower incomes. Connecticut, Maryland, New Jersey, and Rhode Island are examples of states that have adjusted national measurements for their higher incomes or higher housing costs.

Several statistics find that Georgia's cost of living and incomes are less than the U.S. as a whole.

- According to the 2016 price parity measure developed by U.S. Bureau of Economic Analysis (BEA), Georgia prices are 7.9 percentage points less than the U.S. average. ${ }^{25}$ The BEA price parity is calculated using a wide array of items tracked by the Consumer Expenditure Survey (i.e., the same survey used to measure child-rearing expenditures) and rent data that is obtained separately from the Census Bureau's American Community Survey (ACS).
- According to the 2016 ACS, ${ }^{26}$ median gross rent (which includes utilities) in Georgia ( $\$ 933$ per month) is 5 percent less than the U.S. average (\$981 per month).
- The 2016 ACS also finds that median income of married-couple families living with their own children who are under 18 years old is less in Georgia than in the U.S. It is $\$ 85,383$ per year in Georgia, and it is $\$ 92,060$ per year for the U.S. as a whole.
- Similarly, the 2016 ACS finds that median earnings of workers 25-years old or older is less in Georgia than in the U.S. It is $\$ 36,223$ per year in Georgia and $\$ 37,842$ per year for the U.S. as a whole.

[^14]
## Section 4: Findings from the Analysis of Case File Data and Other Data

This section documents the findings from the data analysis required by federal regulation. The findings from the analysis are organized by data source:

- Findings from case file data; and
- Findings from labor market data and other data.

## Findings from the Analysis of Case File Data

Commission staff coordinated with the DCSS and Superior Court Clerks to sample case files in order to fulfill the federal requirement to analyze case file data. In turn, that data was sent to Center for Policy Research (CPR) for analysis. There were two samples of case file data:

- The first sample was generated from court records; and
- The second sample was generated from the DCSS automated system.

The first sample relied on the same sampling protocol used to collect case file data for previous child support guideline reviews. The data are also collected to assess procedural and appropriate documentation of orders that is in turn, used to identify areas where better instructions or training may be needed, which is another task that the Commission staff performs. ${ }^{27}$

Due to the expanded list of data to be analyzed based on the MR (Modernization Rule), specifically the analysis of payment data, which is only available for IV-D orders, the second sample was drawn to supplement the first sample.

Georgia also has a long history of sampling from the court records because it is the best source of both IV-D and private orders; hence, representative of all cases in which the Georgia child support guidelines would apply. The limitation of it, however, is the court does not track payments. In fact, payments in private cases is a private issue so not tracked by any government or court entity unless there is an Income Deduction Order in place.

## Sample from the Court Records

Historically, the sample from court cases has consisted of cluster sampling of 12 counties. Dr. Roger Tutterow, economist and Commission member, designs the sampling to represent a cross-section of Georgia. The sampling strategy selects different counties each review.

In turn, the Superior Court Clerks of the sampled counties are asked to submit child support orders (and their respective worksheet) from the sample month. For this review, the sample month was October 2017. (Historically, October has been chosen because it is a non-holiday month.) If the order is an IV-D

[^15]order, DCSS supplies the final order and respective worksheet. In turn, Commission staff create an Excel database of the information from the orders and worksheets.

Exhibit 9 shows the counties selected for the sampling of the court records. They include the counties of: Brooks, Chatham, Chattahoochee, Dawson, Evans, Hancock, Heard, Henry, Oconee, Pickens, Putnam, and Worth. This resulted in 190 sampled cases from the court records. Several of the counties are small, hence had no to few private or DCSS orders in October to submit. The byproduct is that most of the sample from court records came from Chatham and Henry, which are the two largest counties in the court record sample. Both Chatham County and Henry County have populations over 200,000. In contrast, the other sampled counties have populations of about 9,000 to 34,000.

Exhibit 9 also shows that 101 (53\%) of the cases were private child support cases and 89 (47\%) of the cases where DCSS cases. As mentioned earlier, payment information cannot be obtained in private cases. Payment information for DCSS cases was obtained from the DCSS office. In turn, Commission staff added it to the database.

## Sample from DCSS Automated System

To supplement the court record sample, another sample was drawn from DCSS cases with new orders in calendar year 2016. Initially, 10 percent of all cases meeting that criterion were to be sampled. The original intent was to extract payment data and other data pertinent to the guidelines application or deviation electronically from the automated system. However, that was not feasible. Instead, payment information had to be retrieved manually from DCSS. To reduce manual effort and coordination with several DCSS offices, as well as increase sampling from urban areas, the sample was further limited to counties in the Atlanta area (Clayton, Cobb, Dekalb, Fulton, and Gwinnett). Each of these counties had several cases in the 10 percent sample, some numbered over a 100 cases. To further simplify the effort, while obtaining a sufficient number from each county for sub-analysis, a target of 35 sampled cases with payment information per county was set.

The last two columns of Exhibit 9 show the DCSS sample. The last column includes only those from counties in the Atlanta area, which is 175 cases total. It also shows no cases were sampled from the counties selected for the court file analysis and no cases were selected from non-Atlanta counties. The second to the last column reflects the 10 percent sample, which is a total of 1,577 cases.

## Improvements to Future Sampling

Future sampling should strive to:

- Be representative of the state (hence include both private and DCSS cases);
- Gather data on all of the data fields identified in the federal regulation (e.g., whether there was a deviation, income imputation, and default order, and payment information, and other case characteristics); and
- Minimize the amount of manual effort as much as possible: instead, use data from automated sources wherever possible.

This may include the use of court e-filing (assuming some court records are electronic files or will eventually be), working with DCSS to ensure that its automated system contains the requisite data fields, or other options.

Major Findings from Analysis of Case File Data

## Exhibit 9: Characteristics of Cases

Besides showing the distribution of the samples across counties, Exhibit 9 shows many other characteristics of the sampled cases.

- The vast majority of orders cover one or two children.
- A parent is the custodian (hence the parent who will be receiving child support) in the vast majority of cases. In the DCSS cases where the custodian is not a parent, it is usually a relative (often a grandparent).
- A male or father is the gender of the obligated parent in the majority of the cases. (DCSS notes gender while the court sample notes mother or father.)
- Most of the DCSS cases are never or former TANF cases.

The format of Exhibit 9 is kept to display the remaining findings, so it is easy to note when data are not available.

## Exhibit 10: Incomes of the Parties

Exhibit 10 shows the incomes of the parties used to calculate the guidelines-determined amount. The information is only available from the court records. DCSS does not record the incomes used for the guidelines calculation. DCSS does receive income information from automated sources, such as the State Department of Labor. Georgia is a state that restricts the sharing of that labor data. Other states (e.g., Missouri and New York) allow for it and use it to analyze income as part of their guidelines review. It can also be obtained though the federal Office of Child Support Enforcement through the National Directory of New Hire for research purposes, but there was not sufficient time to engage in that process.

Exhibit 10 shows that incomes used for the guidelines calculation are generally lower in DCSS cases than private cases. Other states have found similar findings. Actual incomes may even be lower since some of these incomes are imputed incomes. Income imputation at full-time minimum earnings, which is a common amount of income imputation, would be in the $\$ 1,000-\$ 2,000$ range. This range accounts for the incomes of 58 percent of the DCSS fathers, 49 percent of private mothers, and 72 percent of DCSS mothers. Income imputation is explored later in this section.

Exhibit 10 also shows the father's share of combined income. This is also used to assign each parent's share of the child's future un-insured health expenses, if any.

| Exhibit 9: Characteristics of Sampled Cases (\% of Cases) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Characteristics | Random Sample from Court Records |  | Random Sample from DCSS |  |
|  | Private Cases $(\mathrm{n}=101)$ | DCSS Cases $(n=89)$ | Statewide $(n=1,577)$ | Atlanta Counties $(n=175)$ |

## Exhibit 11: Order Amounts

Exhibit 11 shows the amount ordered for current support. The averages and medians were in the $\$ 300$ and \$400 range. Private orders tended to be higher and undoubtedly reflect the higher incomes in private cases.

Use of Minimum Order Amounts. None of the one-child orders had an order set at \$100 per month, only two of the two-child orders had a $\$ 150$ order, and none of the three-child orders had a $\$ 200$ order. This suggests infrequent use of the low-income adjustment/minimum order amounts.

Exhibit 12: Payments
Exhibit 12 shows payment patterns. ${ }^{28}$ Payment information is only available for DCSS cases. It was only analyzed for the Atlanta counties due to time constraints.

The time periods considered are slightly different between the two samples. As identified earlier, the court records were pulled from orders established in October 2017. Payments were tracked for the next five months. The DCSS sample was pulled from orders established in calendar year 2016. Payments were tracked for 12 months (i.e., over the calendar year 2017). Due to the different time periods, only

[^16]cases with any payments in the study months are included in Exhibit 12. This includes 73 percent of the court record/DCSS cases and 74 percent of the Atlanta County cases.

The average and median monthly payments were in the $\$ 200$ and $\$ 300$ payment range. The compliance rate is calculated using the total paid over the sample period divided by the monthly order amount multiplied by the number of sample months. It is in the 70 percent and 80 percent range. It is higher than the percent of current support paid because it only includes paying cases.

Payments on more than one order was also collected for the Atlanta County orders. Almost a quarter (23\%) had paid on more than one case.

## Exhibits 13 and 14: Income Imputation and Orders Entered by Default

Based on evidence that payments are lower when income is imputed, and when orders are set through default, the Modernization Rule (MR) essentially requires states child support guidelines to limit the use of imputed income. Income imputation and orders set by default are of interest because they are correlated with non-payment. As specifically, stated in the draft MR:
> [R]esearch suggests that support orders based on imputed income often go unpaid because they are set beyond the ability of parents to pay them. The result is high uncollectible arrears balances that can provide a disincentive for obligors to maintain employment in the regular economy. Inaccurate support orders also can help fuel resentment toward the child support system and a sense of injustice that can decrease willingness to comply with the law. The research supports the conclusion that accurate support orders that reflect a noncustodial parent's actual income are more likely to result in compliance with the order, make child support a more reliable source of income for children, and reduce uncollectible child support arrearages. ${ }^{29}$

A common practice across the country is to impute income at minimum wage. There are some nuances in this practice, however. For example, some judges and decision makers will impute minimum wage to both parents, some will only impute minimum wage to the obligated parent (and use $\$ 0$ income for the custodial parent), and others will use either depending on the circumstance. Another nuance is the hours at which minimum wage is imputed. Forty hours is common, but some impute at less because it is rare for service sector jobs, which are often minimum-wage jobs, to offer 40-hour per week work schedules.

Income imputation data was only available in court file cases. Information about whether the order was entered through default was available from both data sources. Exhibit 13 shows the frequency that income was imputed to the father, the frequency that income was imputed to the mother, and the frequency of orders entered by default or consent. Exhibit 13 shows the frequency by the parent's relationship to the child, not by whether the parent may be obligated to pay support. (In other words, it is not adjusted to consider mothers who are obligated parents or fathers who are custodial parents.) Income may be imputed to the custodial parent. Imputing income to the custodial parent generally lowers the amount of support owed by the obligated parent. Based on court records, income was imputed to the mother more often than to the father in private cases. Based on court records, in DCSS cases, income was imputed to the father in 11 percent of the cases and to the mother in 26 percent of the cases.

Court record data find that there were no private orders entered by default and 12 percent of DCSS orders were entered by default. Data from DCSS records (shown as the data field, "NCP Consented" in Exhibit 13) indicate that 22 percent of DCSS orders were entered by default. The reason for the discrepancy between the two data sources is unknown. It may be an issue with differences in sampling or how the data field is defined. It may also be subject to interpretation. DCSS staff may have to interpret based on information from the docket or from reading the nuances of the actual order.

[^17]Exhibit 13: Cases with Income Imputation and Default

Exhibit 14 shows the average monthly paid by whether income was imputed or whether the order was entered by default. It shows that average payment is less when income is imputed at minimum wage to fathers in DCSS cases. Most fathers in DCSS cases are the obligated parent. The payment patterns by income imputation to the mother are inconsistent. Exhibit 14 shows that payment is less in DCSS orders entered by default according to court records. Exhibit 14, however, shows no differences in payment by whether the order was entered by default or consent according to DCSS data. The court data should be more accurate. The difference, however, may result from sampling.

## Exhibits 15 and 16: Order Amount as a Percentage of the Obligor's Gross Income

Another way that orders are being examined across the nation is as a percentage of the obligated parent's gross income. This is done because of the evidence-based research supporting the Federal Office of Child Support Enforcement (OCSE) rule changes that essentially encourages a self-support reserve in state child support guidelines and limits the use of imputed income. ${ }^{30}$ The underlying research finds that payment rates sharply decline when the order is 20 percent or more of the gross income of the obligated parent for one child and 29 percent or more of the gross income of the obligated parent for two or more children. ${ }^{31}$

Exhibit 15 shows that the order as a percentage of the obligated party's gross income can be calculated from the court records only. It also shows that 13 percent of the private orders and 28 percent of the DCSS orders with one child were 20 percent or more of the obligated parent's income; and 14 percent of

[^18]the private orders and 45 percent of the DCSS orders for two or more children exceeded the 29 percent threshold. In most of these cases, the obligated parent's income was less than $\$ 2,500$ per month.

| $\begin{array}{l}\text { Exhibit 15: Orders as a Percentage of Obligor Gross Income } \\ \text { (\% of Cases) }\end{array}$ |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Characteristics |  |  |  |  |  |  | Random Sample from Court Records $)$

Exhibit 16 examines the average amount paid per month by order amount as a percentage of the obligor gross income. This limits the analysis to DCSS cases sampled from the court records. The information in Exhibit 16 is consistent with the research showing that payments decline after the 20 percent and 29 percent threshold. Some states are using this finding to develop a sliding-scale minimum order that does not exceed these thresholds.

Exhibit 16: Amount Paid by Order as a Percentage of Obligor Gross Income

## Exhibit 17: Deviations from the Guidelines

Federal regulation requires the measurement of guidelines deviations; that is, whether the order amount varied from the guidelines-calculated amount. The underlying premise is that reasons for guidelines deviations may indicate parts of the guidelines that should be changed (e.g., if there are several deviations due to timesharing arrangements, the adjustment for timesharing should be reviewed and appropriately changed.)

Of the 184 cases reviewed through court records, 45 percent had a guidelines deviation. Among court records, the deviation rate is 47.0 percent among private cases and 34.9 percent among DCSS cases. The deviation rate among Atlanta Counties, however, was only 10.9 percent. The court records mostly
includes cases from Chatham County and Henry County. The difference may reflect county differences. In other words, Chatham County and Henry County may not be representative of the entire state.

Nonetheless, the guidelines deviation rate of 45 percent is significantly higher than that of the deviation rate from Georgia's last guidelines review, which was 26 percent. It is also higher than those reported by other states. For example, California's most recent guidelines deviation rate was 17.2 percent, ${ }^{32}$ Pennsylvania's was 25 percent among new orders, ${ }^{33}$ and Maryland's was 22.9 percent. ${ }^{34}$

Exhibit 17 also shows the reasons for the deviations. They were not noted in every deviation. "Other" was the most frequent reason. None of the deviations were due to low income. This is also consistent with the finding stated earlier that few orders were set at the minimum order amount provided for in the low-income deviation (i.e., $\$ 100$ for one child and $\$ 150$ for two children). The fact that no deviations were due to low income is disappointing since DCSS has taken measures to facilitate its use (e.g. trained staff on using the low-income deviation). Nonetheless, some of the low-income deviations could have been coded as "other."

Parenting time was the second most common reason for a deviation among the court file sample. All deviations for parenting time were among private cases. Georgia guidelines do not provide a formula to adjust for parenting time. In contrast, 37 state guidelines provide formulas and criteria to adjust for parenting time. The most common criteria are court-ordered parenting time and a state-determined timesharing threshold (e.g., 30\% timesharing). Providing a formula can reduce guidelines deviations, result in more consistent adjustments for parenting time, and more predictability of the guidelines amounts for parties.

In general, the deviation finding is limited by its sampling. If the counties are not representative of the entire State, the actual guidelines deviation rate may be more or less.

## Analysis of Labor Market Data and Other Data

Federal regulation (C.F.R. § 302.56(h)(1)) requires the consideration of:
...labor market data (such as unemployment rates, employment rates, hours worked, and earnings) by occupation and skill-level for the State and local job markets, the impact of guidelines policies and amounts on custodial and noncustodial parents who have family incomes below 200 percent of the Federal poverty level, and factors that influence employment rates among noncustodial parents and compliance with child support orders;

The review of labor market data appears to be aimed at informing recommendations for guidelines provisions for income imputation and low-income adjustments. The Modernization Rule (MR) requires certain considerations when imputing income, including the recommendation to consider employment opportunities available to the parent given local labor market conditions. As discussed in Section 2, Georgia has made conforming changes to its guidelines to address the new requirements concerning income imputation.

In all, labor market conditions may change more frequently than every four years, which is the minimum amount of time in which a state's guidelines must be reviewed.

Currently, the Georgia economy is doing better than it did previously. In 2016, with a growth rate of 3.3 percent, the Bureau of Economic Statistics ranked Georgia among the top three growing states. ${ }^{35}$ The Georgia unemployment rate was 3.9 percent as of July 2018 , which is the same rate as the U.S. as a whole. ${ }^{36}$ It varies widely by county, however. Five counties (Banks, Echols, Jackson, Oconee and White) have unemployment rates below 3 percent. Still another five counties (Clay, Elbert, Telfair, Taylor and Wheeler) have unemployment rates above 8 percent. The unemployment rates of some of the counties from which the largest number of cases were sampled are:

- Chatham: 3.8 percent;
- Henry: 4.2 percent;
- Clayton: 5.0 percent;
- Cobb: 3.4 percent;
- Dekalb: 4.0 percent;
- Fulton: 4.0 percent; and
- Gwinnett: 3.5 percent.

The Georgia unemployment rate also varies by race and Hispanic origin. As of Quarter 1, 2018, the Georgia unemployment rate was 2.9 percent for whites, 7.5 percent for Blacks, and 4.2 percent for Hispanics. ${ }^{37}$ This is of concern because of the high proportions of Blacks and Hispanics in the child support caseload (i.e., $20 \%$ of all IV-D cases nationally in 2010 involved Hispanic custodial parents and 27 percent involved Black custodial parents). ${ }^{38}$ If Georgia obligated parents also comprise similar proportions of Blacks and Hispanics, they would face these higher unemployment rates. ${ }^{39}$ This may limit their ability to pay child support. It is also of concern for income imputation policies.

The reported unemployment rate is limited to all jobless persons who are available to take a job and have actively sought work in the past four weeks. The U.S. Bureau of Labor Statistics has developed alternative measures that better reflect all persons who are unemployed. For example, the U-6 measure considers those who are marginally attached workers, those who want to work but are discouraged and not looking, and workers employed part-time but who would work full-time if they could. Georgia's U-6 unemployment rate was 8.3 percent in 2017, whereas for the U.S. in 2017, it was 8.1 percent. ${ }^{40}$

[^20]
## Hours Worked and Income Imputation

Hours worked has been used to inform income imputation policies. For example, South Dakota used labor market data on hours worked to reduce the presumption of a 40-hour work week when imputing income since labor market data indicates South Dakota workers usually work 35 hours per week. Based on U.S. Bureau of Labor Statistics data, ${ }^{41}$ the average weekly hours worked in Georgia in July 2018 varied by industry. The average was:

- 35.2 hours per week among all employees in private industry;
- 35.4 hours per week in the transportation sector; and,
- 27.1 hours per week in the leisure and hospitality industry.

## Low-Skilled Jobs and Low-Income Deviation/Minimum Orders

With regard to using the information to inform the low-income deviation, the policy issue is what types of employment/income streams are affected or should be affected by the low-income deviation. Unlike many state guidelines, the current low-income adjustment/deviation in the Georgia guidelines does not specify a threshold for its application. Nonetheless, DCSS has developed policies for when the lowincome deviation may apply. For example, in 2017, the low-income deviation may apply to homeless parents, minor parents enrolled in school, and an obligated parent with income that is less than 80 percent of the federal poverty guidelines (FPG) for one person. The 2018 FPG is $\$ 1,012$ per month, so 80 percent of that would be $\$ 809$ per month. In contrast, earnings from 40 hours at minimum wage ( $\$ 7.25$ per hour) would be $\$ 1,257$ per month.

Below are the average and entry-level wage of some of the most common ${ }^{42}$ Georgia jobs requiring a high school degree or equivalent:

- Security guards: $\$ 13.96 / \mathrm{hr}$ on average and $\$ 9.00 / \mathrm{hr}$ entry level;
- First-line supervisors of food preparation and serving workers: $\$ 15.33 / \mathrm{hr}$ on average and $\$ 9.84 / \mathrm{hr}$ entry level;
- Childcare workers: $\$ 10.21 / \mathrm{hr}$ on average and $\$ 8.57 / \mathrm{hr}$ entry level;
- First-line supervisors of retail sales workers: $\$ 19.63 / \mathrm{hr}$ on average and $\$ 11.46 / \mathrm{hr}$ entry level;
- Sale representatives, services, all other: $\$ 28.25 / \mathrm{hr}$ on average and $\$ 12.78 / \mathrm{hr}$ entry level;
- Sales representatives, wholesale \& manufacturing: $\$ 30.57 / \mathrm{hr}$ on average and $\$ 13.86 / \mathrm{hr}$ entry level;
- Bookkeeping, accounting, and auditing clerks: $\$ 18.96 / \mathrm{hr}$ on average and $\$ 12.21 / \mathrm{hr}$ entry level;
- Customer service representatives: $\$ 16.84 / \mathrm{hr}$ on average and $\$ 10.69 / \mathrm{hr}$ entry level;
- Receptionist and information clerks: $\$ 14.02 / \mathrm{hr}$ on average and $\$ 9.79 / \mathrm{hr}$ entry level;
- General maintenance and repair workers: $\$ 17.27 / \mathrm{hr}$ on average and $\$ 10.76 / \mathrm{hr}$ entry level; and,

[^21]- Team assemblers (production): \$14.41/hr on average and \$9.91/hr entry level.

The Georgia Department of Labor identifies the "hottest careers" -those forecasted to have the largest number of annual job openings through 2026-by highest educational attainment. ${ }^{43}$ For workers whose highest educational attainment is a high school degree or equivalent, those occupations and their respective average annual earnings in 2017 are:

- Automotive body \& related repairers: \$51,500 (\$4,297 per month);
- Electrical power-line installers \& repairers: \$51,000 (\$4,250 per month);
- Supervisors of construction trades \& extraction workers: \$62,400 (\$5,200 per month);
- Supervisors of helpers, laborers, \& material movers: \$51,600 (\$4,300 per month);
- Supervisors of mechanics, installers \& repairers: \$63,500 (\$5,292 per month);
- Insurance sales agents: \$67,800 (\$5,650 per month);
- Production, planning \& expediting clerks: \$48,900 (\$4,075 per month);
- Property, real estate, \& community association managers: \$86,700 (\$7,225 per month);
- Sales representatives, services, all other: \$58,800 (\$4,900 per month); and,
- Sales representatives, wholesale \& manufacturing: \$63,600 (\$5,300 per month).

## 200 Percent of the Federal Poverty Guidelines

Several occupations listed above have average or entry level wages that are less than 200 percent of the federal poverty guidelines for one person. Since the 2018 FPG is $\$ 1,012$ per month, 200 percent would be $\$ 2,024$ per month, which is $\$ 11.68$ per hour assuming a 40 -hour work week. Nonetheless, most of the wages were at least a dollar or two above minimum wage.

## Factors that Influence Employment Rates and Compliance

There is some evidence that child support can affect employment among obligated parents. A 2005 study analyzing Black men who had a high school education or less in the 1980s and 1990s found that child support enforcement accounted for half or more of the decline in employment activity among Black men between the ages of 16 and $34 .{ }^{44}$ Another study finds some weak association of changes in father's earnings with changes in orders among fathers in couples that had their first child support ordered in 2000. ${ }^{45}$ Further, there are many anecdotes of obligated parents who quit working or turn to unreported employment (also called the underground economy) once wages are garnished for child support.

[^22]The limitations of these studies are they are dated (hence do not consider today's labor market and child support enforcement practices) and not specific to Georgia. Opportunities for income from unreported employment are rapidly changing. It is becoming more common to have multiple jobs and one may be unreported employment and the other may be reported employment. Still, more mechanisms are being developed to facilitate the reporting of gig economy jobs (e.g., income from drivers for ridesharing). As is, the earnings from unreported employment are often sporadic and yield inconsistent earnings.

## Section 5: Assessment of Georgia Schedule

The appropriates of the Georgia schedule is assessed using two methods: comparisons to the most current economic evidence of child-rearing expenditures; and, comparisons to bordering states.

## Georgia Schedule Compared to New Studies

Exhibits 18,19 and 20 compare the existing Georgia schedule to the Rodgers-Rothbarth amounts (which is considered the lowest of credible estimates of child-rearing expenditures) and the USDA amounts (which is considered the highest of credible estimates of child-rearing expenditures). Appendix A contains side-by-sde comparisons of the existing schedule to these studies. The comparisons also consider the most current Betson-Rothbarth (BR) measurements, since BR measurements form the basis of most state guidelines. All of the studies are updated to consider 2018 price levels and 2018 federal and state income tax rates and FICA when appropriate. (Appendix B contains more details on how the economic data are converted to a child support schedule in order to be comparable to the Georgia schedule.) The comparisons also consider the economic basis of the existing schedule (the average of the second Betson-Rothbarth study and the Betson-Engel estimates produced from the same study) updated for 2018 prices and 2018 federal and state income tax rates and FICA.

Exhibit 18 compares the amounts for one child, Exhibit 19 compares the amounts for two children, and Exhibit 20 compares the amounts for three children. As found from the analysis of case file data, most Georgia child support orders are for one or two children. The amounts are the basic schedule amounts before consideration of each parent's prorated share. To be clear, they are not order amounts. The exhibits show the schedule amounts between $\$ 800$ and $\$ 30,000$ per month, the same range of incomes covered by the existing schedule.

The exhibits generally show that the existing Georgia schedule is within range of the USDA measurements and the Rodgers-Rothbarth measurements for combined gross incomes less than $\$ 16,500$ per month, which is the highest amount considered by the USDA measurements. This suggests that the existing Georgia schedule is within credible measurements of child-rearing expenditures for this income range. For one and two children, the existing Georgia schedule tracks closely to the BR measurements. At very high incomes (i.e., above about $\$ 23,000$ per month) the BR measurements track higher than the existing schedule. This is due to changes in price levels and consideration of tax reform, which results in more spendable income available for child-rearing expenditures. The BR amounts have been updated for these items.

For three children, the existing schedule is generally tracking below the BR measurements. The same pattern would exist for four and more children.

Existing — BR4 — — USDA ----- Rodgers/Rothbarth $\bullet$ •• U Updated for 2018 prices \& taxes only

$\longrightarrow$ Existing BR4 ——USDA ----- Rodgers/Rothbarth $\cdots$... Updated for 2018 prices \& taxes only

## Comparisons to Neighboring States

The case examples consider median incomes by five different levels of educational attainment of Georgia workers. The data are from the 2016 U.S. Census American Community Survey. ${ }^{46}$ Median earnings are:

- $\$ 15,310$ for females and $\$ 24,725$ for males with less than a high school degree;
- $\$ 22,480$ for females and $\$ 31,977$ for males with a high school degree or GED;

[^23]- $\quad \$ 27,091$ for females and $\$ 41,242$ for males with some college or associate's degree;
- $\$ 41,582$ for females and $\$ 62,471$ for males with a bachelor's degree; and
- $\quad \$ 55,238$ for females and $\$ 81,186$ for males with a graduate or professional degree.

The case scenarios assume the median amount among males is the obligated parent's income and the median amount among females is the custodial parent's income. Statistically, the clear majority of obligated parents are male. The comparisons also consider the guidelines of neighboring states. Exhibit 21 summarizes the economic basis of these state guidelines. The comparisons also include other economic studies of child-rearing expenditures identified in the previous section.

| Exhibit 21: Economic Basis of Neighboring State guidelines |  |  |  |
| :---: | :---: | :---: | :---: |
| State |  | Economic Basis | Price Levels |
| Georgia | $2^{\text {nd }}$ Betson-Rothbarth and | tudies | 2005 |
| Alabama | $3{ }^{\text {rd }}$ Betson-Rotbharth Stud | Alabama's lower income | 2008 |
| Florida | Espenshade-Engel |  | 1991 |
| North Carolina | $4^{\text {th }}$ Betson-Rothbarth study |  | 2014 |
| South Carolina | $3{ }^{\text {rd }}$ Betson-Rotbharth Stud | South Carolina's lower income | 2011 |
| Tennessee | $2{ }^{\text {nd }}$ Betson-Rothbarth |  | 2004 |

Exhibits 22,23 , and 24 , respectively, compare amounts of one, two, and three children. The calculations only consider the obligated parent's prorated share of the schedule amounts. There are no adjustments for additional dependents, child care expenses, the cost of the child's health insurance, sharedparenting time, or other factors.

Based on the comparisons, the existing Georgia schedule are generally in mid-range compared to the economic data and the guidelines of bordering states.

## Minimum-Wage Income

Exhibit 25 compares order amounts for one, two and three children when both parent's incomes are $\$ 1,257$ per month, which is full-time minimum wage earnings. It also compares the guidelines amounts from bordering states. (Tennessee is not shown, however, because they are in the process of updating their guidelines. They are leaning toward adopting a self-support reserve equivalent to $115 \%$ of the federal poverty guidelines for one person and a minimum order of $\$ 65$ per month.)

In all, the comparisons find that the existing Georgia guidelines is within the range of the guidelines amounts of bordering states. North Carolina is the only bordering state in which its self-support reserve would apply to this income. North Carolina's current self-support reserve is just under $\$ 1,000$, but North Carolina is currently reviewing its guidelines and there is a recommendation to update it to the 2018 federal poverty guidelines for one person.

## Section 6: Conclusions and MAjor Findings

This report fulfills the federal data requirements of a state's guidelines review. This includes a

- Review of the economic evidence on child-rearing expenditures;
- Analysis of case file data to determine guidelines applications and deviations;
- Analysis of payment patterns and income imputation; and
- Consideration of labor market data.

## Major Findings

- Georgia guidelines, particularly with the recent changes that became effective July 1, 2018, appear to conform to the new federal rules pertaining to child support guidelines. Some of the nuanced federal requirements of the process (e.g., listing Commission review members and seeking public comment) are not part of the thorough Georgia statute mandating how Georgia should conduct its periodic review. Nonetheless, the Commission, according to Commission staff, intends to comply with those requirements. Federal regulation does not require that those provisions be put in state statute. Most states do not put these nuances in statute.
- Federal regulation requires the review of economic data on the cost of raising children; and, making adjustments if appropriate. The current Georgia schedule of basic child support schedule is generally within range of credible measurements of child-rearing expenditures and yields amounts similar to those of bordering states. The Georgia schedule at very high incomes (i.e., above about combined gross incomes of $\$ 23,000$ ) and for three or more children, however, is slipping into the low range. This is because Georgia has not updated its schedule for changes in price levels or changes in spendable income resulting from tax reform. Updating for these factors alone would result in schedule increases. Still, there is some evidence that Georgia should adjust any measurement of child-rearing expenditures based on national data for Georgia's lower cost of living and lower incomes. In all, the evidence is not overwhelmingly indicating a schedule update is needed now.
- Federal regulation requires the analysis of case file data to determine how often deviations from the guidelines are made. The intent is to keep guidelines deviations at a minimum. Based on the 2018 case file review of court records, using the same clustering sampling strategy used in previous reviews, the guidelines deviation rate is 45 percent. The previous review found a deviation rate of 26 percent. Still another sample of Atlanta counties found a guidelines deviation rate of 11 percent. The data are insufficient to determine if it results from an actual statewide increase or caused by sampling different counties. Nonetheless, the 45 percent rate is higher than that reported by any state.
- Most of the reasons for guidelines deviations are for "other" and do not provide a specific reason. The second most common guidelines deviation reason among cases sampled from court records was for shared-parenting time. Georgia is one of the few states that does not have shared-parenting time formula.
- The low-income deviation was not recorded as the reason for any of the deviations. This is surprising because the Division of Child Support Services (DCSS) has been encouraging its use. It could be that judges are using the "other" code instead when deviating for low income.
- The low-income deviation and Georgia's recently adopted provision to consider the subsistence needs of the noncustodial parent appear to fulfill the new federal requirements pertaining to low income and subsistence needs. Nonetheless, most state guidelines have a presumptive low-income adjustment. Further, most state guidelines specify a dollar amount for a self-support reserve. Relating it to the federal poverty guidelines for one person, which is $\$ 1,012$ per month in 2018 is common. The most common minimum order among states is $\$ 50$ per month regardless of the number of children. Georgia's minimum order is $\$ 100$ per month for one child plus $\$ 50$ for each additional child.
- Federal regulation also requires the analysis of payment data by income imputation and default orders and consideration of labor market data. The analysis indicates that payments are lower when income is imputed at full-time, minimum wage to the obligated parent and in defaults. The data were collected before the July 1,2018 changes to the income imputation provision in the guidelines. It is unclear whether the change would alter this finding if cases after the change were examined. The analysis of labor market data indicates that there are many low-skilled jobs available in Georgia that pay more than minimum wage.

## CONCLUSIONS

This report demonstrates that Georgia has fulfilled the data requirements for a guidelines review as federally required. The major findings point to several possible improvements to the guidelines: update of the schedule at very high incomes and for three or more chldren, adopt a shared-parenting adjustment, and expand and enhance the low-income adjustment. In addition, the increased guidelines deviation rate is of concern, but there is not an obvious solution. The areas of concern of the schedule are generally areas of the schedule used for outlying cases (e.g., few cases have extraordinarily high income). Adopting a shared-parenting adjustment may lower the deviation rate somewhat, but not bring it back to its previous level. Understanding the underlying "other" reasons for deviations may be helpful. The high rate of income imputation at minimum wage is also of concern, but that may be affected by the July 1,2018 guidelines changes to income imputation. To that end, the Commission may want to monitor the impact that the new income imputation provision has on cases.

This was Georgia's first attempt to meet the new data requirements imposed by the 2016 federal requirements including the analysis of payment data. There are improvements to be made in the data
collection, particularly in the use of DCSS data since that is the source of payment data. These improvements concern sampling of DCSS cases and if feasible, adding data fields to the DCSS automated system that would be used for the guidelines review (e.g., a data field noting guidelines deviations, data fields noting parent's incomes, and data fields with payment summaries). This could reduce the amount of manual data collection effort needed. Georgia should also continue to sample private cases in addition to obtaining information from DCSS cases to be representative of the State as a whole.

For comparative purposes child support schedules were developed from:

- Betson-Rothbarth (BR) measurements;;7
- The Rodgers-Rothbarth (RR) measurements; ${ }^{48}$ and the
- USDA measurements for the South. ${ }^{99}$

Step 1. Subtract child care expenses; health insurance premiums; and extraordinary, uninsured health care expenses from estimates of child-rearing expenditures. This step is necessary because the actual amounts of these expenses are considered elsewhere in the guidelines. (These amounts for the BR measurements are shown in Table B-1. The amounts for RR are from Table 11a of the California report. The amounts for the USDA are also contained in the USDA report). An amount equivalent to $\$ 250$ per child is retained to cover ordinary medical expenses.

Step 2. Extend the estimates of child-rearing expenditures - which are for one, two and three children for the BR and RR measurements since there are not a sufficient number of households in the data set with four or more children to measure child-rearing expenditures for larger families - to cover four and more children. The estimates are extended to four and more children using economic equivalence scales. These scales were developed by the National Research Council, ${ }^{50}$ a blue-ribbon panel of academics studying poverty and family income, after extensive research. The USDA measurements are extended using the equivalence scales in the USDA report.

Step 3. Relate the BR and RR estimates of child-rearing expenditures to net incomes. (This step is unnecessary for the USDA measurements because they relate to gross income.) The BR and RR estimates of child-rearing expenditures are expressed as a percentage of total family expenditures. If a family spends all of its after-tax income, then family expenditures and after-tax income are equal and no additional adjustment is necessary. However, some families may not spend all of their disposable income on current consumption items. Hence, the estimates of child-rearing expenditures are adjusted to reflect net incomes.

Step 4. Calculate marginal percentages between income ranges. This step is necessary to gradually phase-in the estimates of child-rearing expenditures between income ranges similar to how a tax table

[^24]phases in different tax rates between income ranges. Otherwise, there would be sudden changes in amounts as the table moved from income range to the next income range.

Step 5. So far, the steps lead to a schedule based on net income for BR and RR. It is backed out to gross income using federal and state income tax withholding formula assuming all income is earned by a single or head-of-household with two allowances. (The IRS provides the same formula for single and head of household).

| Annual Net Income Range (2018 dollars) | Number of Observations | Current Consumption as a \% of Net Income | Expenditures on Children as a \% of Total <br> Consumption Expenditures <br> (Rothbarth 1998-2004 data) |  |  | Child Care \$ as a \% of Consumption (per child) | Medical \$ as a \% of Consumption (per person) |

## Consumer Expenditure Data

Most studies of child-rearing expenditures, including the BR measurements, draw on expenditures data collected from families participating in the Consumers Expenditures Survey (CES) that is administered by the Bureau of Labor Statistics (BLS). Economists use the CES because it is the most comprehensive and detailed survey conducted on household expenditures and consists of a large sample. The CES surveys about 7,000 households per quarter on expenditures, income, and household characteristics (e.g., family size). In the survey quarters used in the fourth BR (BR4) study (i.e., first quarter of 2004 through the first quarter of 2009), households remain in the survey for five consecutive quarters, with households rotating in and out each quarter. Most economists, including Betson, use three or four
quarters of expenditures data for a surveyed family. This means that family expenditures are averaged for about a year rather than over a quarter, which may not be as reflective of typical family expenditures.

In all, the BR4 study relies on expenditures/outlays data from 7,846 households in which 2,937 households were childless married couples and 4,909 were married couples with children. The subset of CES households used for the BR4 study consisted of married couples of child-rearing age with no other adults living in the household (e.g., grandparents), households with no change in family size or composition during the survey period, and households with at least three completed interviews.

The CES asks households about expenditures on over a hundred detailed items. Exhibit C. 3 shows the major categories of expenditures captured by the CES. It includes the purchase price and sales tax on all goods purchased within the survey period. In recent years, the CES has added another measure of "expenditures" called "outlays." The key difference is that outlays essentially include installment plans on purchases, mortgage principal payments, and payments on home equity loans, while expenditures do not. To illustrate the difference, consider a family who purchases a home theatre system during the survey period, puts nothing down, and pays for the home theatre system through 36 months of installment payments. The expenditures measure would capture the total purchase price of the home theatre system. The outlays measure would only capture the installment payments made in the survey period.

The BLS designed the CES to produce a nationally representative sample and samples representative of the four regions (Midwest, Northeast, South, and West). The sample sizes for each state, however, are not large enough to estimate child-rearing costs for families within a state. We know of no state that has seriously contemplated conducting a survey similar to the CES at a state level. The costs and time requirements would be prohibitive.

Outlays include mortgage principal payments, payments on second mortgages and home equity payments, which is what the 2010 Betson-Rothbarth measurement considers. The CES traditional measure of expenditures does not consider these outlays. The merit of using expenditures, which does not include mortgage principal payments, is that any equity in the home should be considered part of the property settlement and not part of the child support payments. The limitations are not all families have substantial equity in their homes and some families have second mortgages or home equity loans that further reduce home equity. The merit of using outlays is that it is more in line with family budgeting on a monthly basis in that it considers the entire mortgage payment including the amounts paid toward both interest and principal, and the amount paid toward a second mortgage or home equity loan if there is such a payment. Both measures include payment of the mortgage interest, rent among households dwelling in apartments, utilities, property taxes, and other housing expenses as indicated in the above table. Housing-related items, which are identified in Exhibit B-2, comprise the largest share of total family expenditures. Housing expenses compose about 40 percent of total family expenditures.

| Exhibit B-2: Partial List of Expenditure Items Considered in the Consumer Expenditure Survey |  |
| :---: | :--- |
| Housing | Rent paid for dwellings, rent received as pay, parking fees, maintenance, and other expenses for <br> rented dwellings; and interest and principal payments on mortgages, interest and principal <br> payments on home equity loans and lines of credit, property taxes and insurance, refinancing and <br> prepayment charges, ground rent, expenses for property management and security, homeowners' <br> insurance, fire insurance and extended coverage, expenses for repairs and maintenance <br> contracted out, and expenses of materials for owner-performed repairs and maintenance for <br> dwellings used or maintained by the consumer unit. Also includes utilities, cleaning supplies, <br> household textiles, furniture, major and small appliances and other miscellaneous household <br> equipment (tools, plants, decorative items). |
| Food | Food at home purchased at grocery or other food stores, as well as meals, including tips, <br> purchased away from home (e.g., full-service and fast-food restaurant, vending machines). |
| Transportation | Vehicle finance charges, gasoline and motor oil, maintenance and repairs, vehicle insurance, public <br> transportation, leases, parking fees, and other transportation expenditures. |
| Entertainment | Admission to sporting events, movies, concerts, health clubs, recreational lessons, <br> television/radio/sound equipment, pets, toys, hobbies, and other entertainment equipment and <br> services. |
| Apparel | Apparel, footwear, uniforms, diapers, alterations and repairs, dry cleaning, sent-out laundry, <br> watches, and jewelry. |
| Other | Personal care products, reading materials, education fees, banking fees, interest paid on lines of <br> credit, and other expenses. |

Transportation expenses account for about one-fifth of total family expenditures. In the category of "transportation," the CES includes net vehicle outlays, vehicle finance charges, gasoline and motor oil, maintenance and repairs, vehicle insurance, public transportation expenses, and vehicle rentals, leases, licenses, and other charges. The net vehicle outlay is the purchase price of a vehicle less the trade-in value. Net vehicle outlays account for about one-third of all transportation expenses. Net vehicle outlays are an important consideration when measuring child-rearing expenditures because the family's use of the vehicle is often longer than the survey period. In Betson's first three studies, he excluded them because in his earlier estimates that consider expenditures the vehicle can be sold again later after the survey period. In contrast, Betson's 2010 estimates that consider outlays capture vehicle payments made over the survey period. The USDA, which relies on expenditures, includes all transportation expenses including net vehicle outlays. There are some advantages and disadvantages to each approach. Excluding it makes sense when the vehicle may be part of the property settlement in a divorce. An alternative to that would be to include a value that reflects depreciation of the vehicle over time, but that information is not available. Including the entire net vehicle outlay when expenditures are used as the basis of the estimate likely overstates depreciation. When the basis of the estimates is outlays, it includes only vehicle installment payments rather than net vehicle outlays. This effectively avoids the issues of vehicle equity and depreciation.

Betson excludes some expenditure items captured by the CES because they are obviously not childrearing expenses. Specifically, he excludes contributions by family members to Social Security and private pension plans, and cash contributions made to members outside the surveyed household. The USDA also excludes these expenses from its estimates of child-rearing expenditures.

Gross and net incomes are reported by families participating in the CES. The difference between gross and net income is taxes. In fact, the CES uses the terms "income before taxes" and "income after taxes" instead of gross and net income. Income before taxes is the total money earnings and selected money receipts. It includes wages and salary, self-employment income, Social Security benefits, pension income, rental income, unemployment compensation, workers' compensation, veterans' benefits, public assistance, and other sources of income. Income and taxes are based on self-reports and not checked against actual records.

The BLS has concerns that income may be underreported in the CES. Although underreporting of income is a problem inherent to surveys, the BLS is particularly concerned because expenditures exceed income among low-income households participating in the CES. The BLS does not know whether the cause is underreporting of income or that low-income households are actually spending more than their incomes because of an unemployment spell, the primary earner is a student, or the household is otherwise withdrawing from its savings. In an effort to improve income information, the BLS added and revised income questions in 2001. The new questions impute income based on a relationship to its expenditures when households do not report income. The 2010 Betson-Rothbarth measurements rely on these new questions. Previous Betson measurements do not.

The BLS also does not include changes in net assets or liabilities as income or expenditures. In all, the BLS makes it clear that reconciling differences between income and expenditures and precisely measuring income are not parts of the core mission of the CES. Rather, the core mission is to measure and track expenditures. The BLS recognizes that at some low-income levels, the CES shows that total expenditures exceed after-tax incomes, and at very high incomes, the CES shows total expenditures are considerably less than after-tax incomes. However, the new income questions used by the BLS ameliorate some of this perceived anomaly at low incomes. The consideration of outlays rather than expenditures at high incomes lessens some of the perceived anomaly at high incomes.

In developing child support guidelines, a long-standing assumption has been that at higher incomes the difference between after-tax income and expenditures is a form of "savings." This includes traditional savings (i.e., deposits into a bank account) and other contributions to family wealth such as mortgage principal payments, which are included in CES measurement of expenditures but not in the CES measurement of outlays.

A high level of "savings" seems to contradict reports about the national savings rate being low. However, economists calculate the national savings rate using a different methodology. ${ }^{51}$ Some of the differences concern the treatment of housing and medical expenses. When calculating the national savings rate, economists define savings to be the difference between disposable income and consumption. In defining consumption, economists impute the rental value of housing to homeowners even though the rental value may exceed the mortgage payment. Similarly, economists impute the

[^25]value of all medical services received even though there was insurance coverage and the family incurred no out-of-pocket expense. These imputed values increase consumption considerably and hence, reduce the national savings rate. In fact, the escalating cost of health services contributes significantly to the declining national savings rate. ${ }^{52}$
