RE: Alternative Low-Income Table
```

This memorandum provides 3 alternative low-income table that apply a minimum order to obligor incomes of $\$ 1,500$ per month and below. The request was made at the June subcommittee meeting.

## Key Notes

- $\$ 1,500$ obligor income threshold for minimum order. The threshold $\$ 1,500$ is the approximate grossincome eligibility threshold for the Supplemental Nutrition Assistance Program for one person. (The gross income eligibility threshold is $130 \%$ of poverty where the 2023 federal poverty guidelines for one person is $\$ 1,215$ per month.)
- Use of percentages for minimum order. For obligor incomes of $\$ 1,500$ per month, a percentage of income formula is used to arrive at a $\$ 0$ amount when there is no income. This is consistent with the intent of the low-income adjustment required in the 2016-added federal rules pertaining to child support guidelines. ${ }^{1}$
- Percentage amounts. The minimum order thresholds start with $20 \%$ for one child because the narrative of the 2014 proposed federal rule changes cites research that finds that orders go unpaid if they exceed 20\% of the obligor's income. ${ }^{2}$ The actual research is greater than $19 \%$ for one child and greater than $29 \%$ for two or more children. ${ }^{3}$ Further, subsequent research finds default and income imputation matter more at explaining non-payment than the order amount. ${ }^{4}$

The three options vary by their phase-out of the low-income table.

- Option 1500.A phases out the low-income table at obligor adjusted gross incomes of \$3,000 per month (about twice $\$ 1,500$ per month, so about $230 \%$ of poverty).
- Option 1500.B is more generous than Option 1500.A. It phases out the low-income table when the basic obligations of the income shares tables produce the same percentages as the minimum orders.
- Option 1500.C is the least generous. Its phase out is more aggressive, but adequate to maintain economic incentive to earn more.

[^0]|  | Major Advantages | Major Disadvantages |
| :--- | :---: | :---: |
| More generous | $\bullet$ Less likely to erode with time | •May be perceived as too much of a decrease <br> today <br> Less generous$\quad$May be less controversial because <br> less change |
| Could become outdated quickly if cost of <br> living keeps increasing at recent pace |  |  |

## Draft Provision for the Adjustment

For the purpose of calculating a low-income adjustment when the noncustodial parent's gross adjusted income is less than $\$$ $\qquad$ per month, the noncustodial parent's minimum child support for one child shall be not less $20 \%$ of the noncustodial parent's gross adjusted gross income, and such amount shall be increased to $24 \%$ of the noncustodial parent's gross adjusted gross income for two children... If the order amount without application of the low-income adjustment is less than that with the low-income adjustment, the lower amount shall be ordered.

## Other Notes:

- The term, "obligor" is used for what Georgia currently calls the "noncustodial parent."
- Utah staggers the tables to account for the low-income adjustment applying to higher incomes when there are more children.
